Project AngelBook – Volume X – Parts 1–36

By Ezekiel Redik Yarbrough

-

This volume is not made up of my own words. There is no original
commentary

here, no narrative, no analysis. This is simply me copying and
pasting large

chunks of text from my bookmarks—pages that were easy to
extract, with no

hyperlinks or formatting issues, saved from open tabs and
archived corners of
the web.

It's messy. It's unfiltered. It's chaotic. But it's valuable.

Each piece inside this volume was bookmarked for a reason. Not
always because I

agreed with it, but because it felt like a fragment of something
larger—an

insight, a worldview, a download. This is source material, plain and
raw.

Fragmenta Ex Machina isn't about authorship. It's about
preservation and

system-building. It's about feeding the machine—laying bricks for
the

Operating System I'm constructing across these books. This is the
raw intake

phase. The memory dump. The zero layer.

Later volumes will be cleaner, more refined, more structured. But
this? This is the

foundation. The ether stream, bound and frozen before it
vanished.

So if you're looking for polished prose, skip this one. But if you're
here to explore

the roots of something much bigger, this is where the signal begins.

Welcome to the fragments.

— Ezekiel Redik Yarbrough Architect of the Machine

Yup. Let the hoarding of the tomes begin. Keep on circulating the tapes.

OP

•

Aye Aye! I am very thankful those were released. They are not only important to the current state of the OTO but for Thelemic history as well. To those unaware of what we

are speaking of check out the links in my comment and within the “view all“ screen search for: The Temple of Solomon the King/A.'. A.'. Expanded, Organized, and Revised by a Student of the System/Libri/State of the Caliphate OTO/

While I have not released any public version of it yet my version of this ZIP has been greatly expanded upon and modified from the original (added a ton from various other Orders and traditions, got rid of duplicate files, made it easier to navigate etc) and while it is still a Work in progress I will eventually be posting it up online. This collection is not bad but it is a little outdated and lacks certain things (such as a full Masonic library, a backup of various OTO websites, a backup of various A.:A.: websites, a backup of Parareligion etc etc).

It is my hope that the hacking of The Internet Archive and their WaybackMachine alerted the general public across all fields (esoteric and exoteric) just how much is only available because of this one service. Likely 50% or more of Wikipedia’s citations lead to WaybackMachine links of archived websites. I have spent countless days backing up as much Thelemic history as I can be that old Geocities posts n conversations or OTO n A.:A.: website posts as well as interactions here on Reddit or within Discord [where appropriate I censor names and genuinely do my best to make obvious my intentions which are preservation and promulgation (not necessarily of Crowley’s ideas but the manifold ideas of those his Work influenced whether directly or indirectly)

1 PDF read is worth 10,000 stored

11

muffinman418

OP

•

1y ago

Absolutely. Not that I think you were advocating against it but for the sake of the thread here are multiple reasons to have a few thousand PDFs stored:

1: While reading something lets say about the Ruach and you use the search function on your computer to search [contains “ruach“] a few dozen results appear which you can use to compare and contrast (especially useful for comparing traditions)

2: Preservation. The internet is not as we were told as kids “forever“ and a sad amount of Thelemic and esoteric history has been lost already due to poor preservation. The Internet Archive is not only in serious legal trouble but was recently hacked and went down entirely. I strongly advocate for everyone building their own digital library with multiple redundancies

3: Figuring out what clicks with you and what does not. There are many books that jive with others that don't jive with me and vice versa. Libraries like this allow me to taste test books and then buy physical and support the authors if that is a possibility.

4: Learning discipline. Every website nowadays has an infinite scroll function which does no one any favours... except teaching those who are capable of being diligent in how they interact with what is online. I read a book or a PDF or listen to an audiobook 3-5 hours per day but a few years ago I would do little more than skim collections.

5: Offline research capabilities. Using the search like I mentioned in 1 with all the stuff I have added to my Library (everything from physics textbooks to Mesopotamian history to medieval monoglyphs to entire websites, encyclopedias etc I can confidently carry out complex research without internet whenever I please so long as I have either my phone (with USB dongle) or my laptop.

[NOTE] Edit Comment: Some have said certain links within the "view all" of the ZIP are not working. This may be because the website is still recovering from the hack. My apologies, I thought they had fully recovered when I made the post. Internet Archive should have those files operating again soon. In the meantime you can use the torrent link and rather than download the whole torrent use your torrent client's file selector.

Original comment: The Temple of Solomon The King Collection (first link goes to the "view all" screen, the one you see in the attached image, of the zip file... go with this one if you want to pick and choose what you want to download rather than downloading the whole 50GB+ ZIP but if you want the whole zip just go to the 2nd link below):

https://ia803206.us.archive.org/view_archive.php?archive=/23/items/thetempleofsolomontheaking_202006/The%20Temple%20of%20Solomon%20the%20King.zip

https://archive.org/download/thetempleofsolomontheaking_202006 (this will lead to the repository's main page where you can click on the .zip for the download or the torrent if you want to try to torrent it (seed as you Will)

Absolutely beautiful.

So right now I happen to be moving and I started a library of notes I have, old and new, occult or otherwise, because I really gotta not cart around a million paper notebooks and actual books with me.

I was also thinking of virtualizing my books and notes because of some other logistical reasons. My husband was telling me to back it all up to flash drives and mobile devices and the cloud and such and that's been eating some of my spare time....

And as I'm slowly building that library and transcribing notes and finding old books from ages ago.....you beautiful bastard, you drop this. It even has some stuff I had to sell because I simply don't have the ability to house the hard copies anymore.

In the words of Keanu Reeves, you're breathtaking!

Until there's a blackout. I'd rather try and get a library in order before then so you can

actually read if it does... that's probably how stuff was lost before to be honest.

Also, for the price of it, the Sacred-Text archives is an entire esoteric library that contains almost everything thelemic published.. I have the flash drive so if there's no internet but electricity, at least could be read, but like my first part it's nice to have actual paper.

i'm not a believer in karma, but i do believe in bad energy. i'm a broke witch, and a lot of amazing works of literature are available on torrenting sites. bad energy to get them from there?

the reason i ask this, is because i cannot afford most amazing and recommended works of literature and spell books that i find through this subreddit, but i have found that many of them are available to download through websites that allow you to download them for free. i am weary of doing so because i genuinely do not want to bring in any bad energy, and some see this as stealing since the author/artist does not receiving payment for this obviously.

years ago, i had a friend who stole a tarot deck from barnes and noble. granted, its a big box store and i always say that if you're gonna steal, do it from big corporations and never from small businesses. but still, stealing a tarot deck? he did a reading for me once and the energy i felt while he did was heavy and uncomfortable.

so i guess what i'm asking is, what do y'all think? do you see this as stealing?

Libby is an app you can use on your phone. It connects to your local library and you can get books for free on your phone as long as you have an active library card.

Came to say this. And if you can't find it in print, check the ebook catalog. My library uses Libby and Hoopla. I can usually find what I'm looking for in at least 1 of the 3 including audiobooks. Often I find something I wasn't looking for!

I'm sure I wasn't perfect, I probably missed something. It was only a few series, but it felt good to eventually give money to the creators of the things that I enjoyed

Also, all the warnings about torrenting stuff are totally valid and you should always check your local library first.

I personally wouldn't do it, but I know people who would and I'm not gonna look down on you for doing it. At least it's not as bad as buying a counterfeit tarot deck because the environment is harmed to create a physical product. Does your nearest library not have any spiritual or witchcraft books to rent?

Also, the B&N nearest me has put all their tarot and oracle decks behind the counter now because people kept stealing them. Now I'm not able physically hold and go through the decks to get their vibe without being forced to bother someone working who's trying to do other things while I'm squinting at decks trying to read what they are..... Yes, I'm salty about it lol

Okay I'm a blogger so I'm going to tell you this.. (no I don't write about witchcraft) anyway, there are hundreds of witchcraft blogs out there. Many of them don't care if you buy anything or not because we make our money when you scroll past the ads. So feel free to go to any witchcraft blog and subscribe to their email lists follow them on Facebook or Pinterest or Instagram or Twitter or whatever!

Follow them and read what they have to say. Pinterest is great because you can find hundreds of blogs by just searching candle spell or something like that. So go check out blogs because they want you there. They want you to read their stuff. A lot of them have free downloads like cheat sheets. And they get paid by the ad networks so you are contributing just by reading and they are offering this information freely.

It's not bad energy spiritually to use such sites. However it is risky. So many sites get

shut down and mirrors of them pop up, there is the risky of finding the wrong ones and downloading a bad file.

And there is the ethical side of the writer not getting paid.

However many authors have in the past had willingly issued copies of their books for free and so some of those copies may end up on such sites. And there is the cost factor in authors who no longer have a book that is still in print and so finding physical copy that is affordable is next to impossible.

It's on your shoulders to use such sites or not.

I see the library and Libby being mentioned already so I'm gonna toss out Thrift Books too. Yes, it's still purchasing but maybe you'll find something in your price range. Or something more reasonable to save for.

I'm in the process of writing my own book and know several authors. I would suggest not stealing. Simply because most authors in witchcraft are small time folks, they deserve to be compensated for their work.

An alternative might be finding if said author has a donation link somewhere? Send them whatever it is you can afford?

I think witchcraft belongs to everyone and I would joyfully share my skills and knowledge for free. Except I need to eat, ya know?

13

TofuPropaganda

•

1y ago

I'd suggest trying to find options like a thrift store, or library may offer some better means of procuring the books, even if for a short while. Torrent sites can have questionable downloads and it would suck to download a virus that kills your computer when you don't have the money to fix it.

Of course the obvious thing, as people are saying, is to use the library or the Libby app. Or maybe even support your local used bookstore. I will say this as an author, if you're

gonna pirate books (and I get why some people do)...at least leave a nice review or recommend it to a friend! That does help to even the score a bit.

I was taught one mustn't haggle or bargain for anything you mean to use for magic, but traditionally stealing outright is technically fine, so long as you don't get caught. Mercury ☿ is a god of magic and a god of thieves.

Witchcraft sides with the underdog against the high and mighty. You're fine torrenting books to learn from There are also many, many, many classics in the public domain on various esoteric archives.

The only thing I caution against with torrented occult books is that some internet bad actors will edit ebook pdfs for upload to torrent and free library sites, especially books on the occult, to include their own agendas.

Make sure you download a few different versions for comparison.

My general rule is that if the author is both a) still alive and b) not an asshat I'll try to buy the book... For everything else there's piracy.

To everyone saying "the library is free", libraries are limited to the books they possess in their collections. Even if you're able to have them bring a book in from an outside library, you're still limited to books within that particular library system. Witchcraft and the occult are enormous topics spanning thousands of years across all cultures and continents and the average library's theology section is painfully limited (both by acquisitions budgets and by good old Dewey himself who did anything other than Christian apologetics a disservice in the cataloging system). Depending on the book OP is looking for, some occult texts have limited copies and can run in the thousands of dollars. Your only chance at reading one might be hoping someone, somewhere scanned and uploaded it.

I love the library. Talk to the local librarians!

You can also see if anyone is interested in giving away/ reselling old books that don't for their practice anymore. (Facebook marketplace, fb groups, paperback swap sites, etc)

I would just trust your gut tbh on what feels right for you. I read tarot but went to a reader once who had mostly good reviews to get more experienced insight. I felt scammed cause I could tell she was making up stuff about my situation to worry me, trying to get me to pay hundreds for her additional "cleansing services", especially because she wouldn't disclose what it actually entailed and "wouldnt be able to show the work". As if I'm gonna give money to someone blindly and not see any proof of materials or rituals I'm paying for. I didn't leave a bad review like I wanted to cause my gut told me not to piss off a fellow witchy person lol maybe others were too scared to leave bad reviews too.

Will God Forgive Me for Practicing Witchcraft and Other Occult Practices

I would like to know if God will forgive me for practicing witchcraft and other occult practices here and there the past 3 years or even longer than that. i have been a christian my whole life (mostly lukewarm unfortunately) and i've gone through confirmation and baptism and i go to church and pray. a few years ago i was exposed to witchcraft during covid through tiktok videos and a few of my friends also practice it. I never truly realized how evil it was and how against the bible it was since i was a lukewarm christian up until recently which now i have changed my ways and i feel very close with god and i repent for all of my sins. I did things such as manifestation, spells, cutting chords, tarot readings, having reiki done on me, having my handwriting read as graphology, believed in astrology and having my chart read and analyzed, believing in the power of crystals, doing yoga, meditation, summoning ghosts with my friends and playing those stupid "scary games" basically summoning ghosts and demons such as bloody mary, charlie charlie, and so on. i used many of these practices for selfish reasons and i feel so horrible for being so blinded by my own desires. i take full accountability and i know what i did was so wrong and i know i was so selfish and i strayed so far from the lord. I was also so selfish in the past too not only practicing witchcraft but also praying to god for selfish things such as my atheist ex boyfriend to come back to me since i was so heartbroken. I was praying saying "i will do anything please lord can he come back to me". instead of praying for peace and strength to overcome my sadness i instead prayed for him to come back. in that period of heartbrokenness i also watched many of those tiktok videos that say "if you interact 3 times with this video ____ will happen" or "if you use this sound ____ will happen" mostly about my ex coming back or something similar and i prayed they would work. i didn't realized how unbelievably wrong that was to not only believe and pray in other powers other than god when i was practicing witchcraft but also being so so so selfish when i

WAS praying to god. Will God forgive me for these things? i feel like such a failure for being so ignorant and falling into the traps of worldly temptations. please pray for me as i want to strengthen my mind and become free from all of the evil i brought into my life.

As often as we repent, God will forgive us. We must be willing to honestly strive not to do those things again, and pray to God for the essential help of Jesus Christ's Atonement in our live.

Funnily enough Bloody Mary has a completely Christian origin. Bloody Mary references Mary Tudor who famously burned Protestants when she was Queen of England. So if you're Catholic then you were immune to the wrath of Bloody Mary. However if you're anything other than Catholic then watch out. A ghost story to be sure but one inspired by Christian conflict which created a Christian boogeyman.

No. We need to repent or stop sinning by accepting and practicing the Christ's spoken words. Otherwise a person is condemned if they reject the Christ's word and not practice his words:

Luke 6:46-49 'Why do you call me, "Lord, Lord," and do not do what I say? 47 As for everyone who comes to me and hears my words and puts them into practice, I will show you what they are like. 48 They are like a man building a house, who dug down deep and laid the foundation on rock. When the flood came, the torrent struck that house but could not shake it, because it was well built. 49 But the one who hears my words and does not put them into practice is like a man who built a house on the ground without a foundation. The moment the torrent struck that house, it collapsed and its destruction was complete.'

John 12:48 'There is a judge for the one who rejects me and does not accept my words;

the very words I have spoken will condemn them at the last day.'

John 5:14 'See, you are well again. Stop sinning or something worse may happen to you.'

Luke 5:32 'I have not come to call the righteous, but sinners to repentance.'

This nonsense and lies of confessing sins and acceptance of the sacrifice or the death of the Son of Man on the cross is a perfect religion for those who want to honor the Christ with their lips but their hearts are far from him and to worship him in vain, i.e. to keep sinning and being wicked:

Mark 7:6-7 'These people honour me with their lips, but their hearts are far from me. 7 They worship me in vain; their teachings are merely human rules.'

Christianity obviously hasn't learned why God desires mercy not sacrifice:
Matthew 9:13 'But go and learn what this means: "I desire mercy, not sacrifice." For I have not come to call the righteous, but sinners.'

Sacrifice does not require repentance or to stop sinning. Meaning a person is still a sinner and evil as they are not accepting and practicing the Christ's teaching. Therefore they will be condemned at the last day:

John 12:47-49 'If anyone hears my words but does not keep them, I do not judge that person. For I did not come to judge the world, but to save the world. 48 There is a judge for the one who rejects me and does not accept my words; the very words I have spoken will condemn them at the last day. 49 For I did not speak on my own, but the Father who sent me commanded me to say all that I have spoken.'

Anyone here who wants me to elaborate or interested in learning more, just start a chat with me.

I do take the narrow path that only a few people find that leads to life. I don't belong to the world nor have a place to lay my head but what good is it for someone to gain the whole world, yet forfeit their soul?

[Do you actually believe in the paranormal?](#)

So I've been practicing ceremonial magick for 6 years already, but with an increasing curve in discipline at first and almost reducing my practice to turn into christian mysticism last year, because I thought it would give me what I've been wanting.

So I felt some strong effects and had a dozen or so deep experiences, specially those times I meditated twice daily...but been reading my first magick journal and what my goals were in 2019 turned completely upside down in the end...I mean everyone I've known enter into this to have an "easier" life...then one more experienced guy comes and tell you that was not the point for starters, and my life has become hellish, anxiety increased exponentially over those years.

So I mean even the LBRP is polarizing...it's a banish ritual that doesn't actually banish "entities" neither does protect you...even Lyam Christopher says it's a very misunderstood ritual that actually makes your life harder, so I ask myself what's the point?

I don't know if there's something out there, but I think we are too far from being able to pull the right strings...in the other hand most of the stuff has great coincidences with some advanced psychology techniques so wanted to know from practicing people if you still believe in the "paranormal", if you see this as coping, or you are so used to this that stop doing them would feel weird?

Please my interest in knowing and learning from your experiences is honest.

Edit: fixed a typo

I think a lot of the "modern magick" stuff circulating these days has lost any connection with praxis that goes beyond "advanced psychological techniques," and a lot of what we've been conditioned to expect as "paranormal experiences" are just Hollywood elaborations of superstition and folklore, so it can be quite a process to unlearn all the bullshit and get on a path that leads to good results.

Sometimes, finding that the pursuit of magic has led us into a more hellish material life means it's time for a reset and a reappraisal of the principles that ground us.

As a chaote, yes and no.

The supernatural is often misunderstood. Most people's idea of it is this vague,

fantasy-like thing straight out of fiction. It's not that. I usually urge new practitioners to understand what the supernatural actually is before diving deeper, because it can get very confusing otherwise.

You mention psychology, I actually study psychology, and I think it goes hand in hand with magick. My belief is that everything lies within consciousness. Call it God, the Universe, or whatever you like reality is ultimately an extension of our consciousness. Psychology supports this in a way: everyone lives in their own version of reality.

Magick, then, is the art of manipulating consciousness. Notice how much of it engages the mind. Whether you're working with the unconscious, subconscious, superconscious, gnosis, thoughtforms, or servitors it's all consciousness work at the core.

TL;DR: There isn't some external "thing" out there doing the magick. You are doing it by shifting and shaping your own consciousness, which in turn shapes reality.

Esoterically speaking, this is the same as bending reality, interacting with the fabrics of reality or whatever.

50

u/enhancedy0gi avatar

enhancedy0gi

•

2mo ago

A bit vague for me. Are you implying 'bending reality' involves affecting your experience of qualia as a person, or actually effectuating change beyond the particles you're inhabiting as a consciousness, independent of speech or action?

5

breredit

•

2mo ago

If we had a window into a higher dimension where our consciousness appeared to us much like any object does to us in our current dimension, we would see consciousness impacting physical reality in our dimension more clearly.

But from our current dimension, we can't "see" consciousness in its totality as an object. We know it exists bc it's how we experience anything. But from our perspective it has these mysterious properties where it's sort of everywhere and nowhere, popping in and out of reality at odd times, and its intensity waxes and wanes so we don't have a linear relationship ship with it. A black box looks very different when your perspective is inside the box rather than outside of it. Blavatsky believed that the box was YOU and to dissolve that YOU, you dissolve the black box and see everything as it is...and regain the non illusory reality of you.

It's a puzzle until what's puzzled goes away...

9

Galliad93

•

2mo ago

I would only add that the universe you experience is different for everyone. And you shifting yourself with magick is not doing it for anyone else. that is why you cannot test it by obversiving someone else.

Couple things OP.

Do I 'believe' in the paranormal? No. I KNOW it exists. My experiences, luckily or unluckily, regarding the paranormal is what got me interested in all of this. It's not a question for me.

I would ask you this: what is your goal with working with rituals and the occult?

Are you trying to know if there is an afterlife? Trying to get more powerful? Wondering what the limits of human psi/consciousness is?

I would say this: maybe you would do well switching away from ritual Magick. There are A LOT of different ways to experience psi/consciousness/paranormal.

Try the Gateway Experience tapes. Hop on over to r/remoterviewing and try a remote viewing methodology. I highly recommend learning how to Lucid Dream. And after that, experiment with astral projection.

These are great, and safe (except in the rarest of occasions) ways to explore reality that do not involve working with entities or doing rituals. Everything you need in life/existence is already inside of you. You don't need to follow some Grimoire, or even need to believe in any one thing. Learn how to use your own mind to explore the universe and figure it out for yourself, experientially.

The Gateway tapes are excellent, and essentially standardize trance states.

You can tell a GWE graduate to go to focus 15, and everyone knows the specific brainwave state to enter.

Hope more people find them 😊

Hi there, well I had my share of very deep experiences as I've said and those moments I knew it for sure there was something, but life goes on and what is left is information...I know I can get into a trance with some days of focused practice and then experience very blissful states of conscience. But it can be a trick of the mind too...even though a very cool and desirable one.

As I've stated wanted to make my life easier, that was my reason to dive into this. It was not that occurred it to me, it was basically the premise behind the material I've studied. Then got in Golden Dawn and it was also the premise.

I will give a look to your suggestions.

Thank you for answering.

If an easier life is what you desire, maybe your best path is to reframe how you perceive the world. I recommend this video and channel. He goes in depth into human psychology using elements of Jungian ideas, Buddhism, etc. Click baity title but excellent stuff.

Working on the self, the internal, will only make you a better magical practitioner if and when you're ready to move along the path.

In my experience, magic/energies/entities exist both within our psyche and outside of it. It's both an external element and purely psychological. Rituals/psychodrama exist to 'tune' our metaphysical mind to our goal/will and awaken our unconscious mind/spirit, at the same time the various paraphernalia used have their own natural vibrations/energies that help to further said goals. The entities (deities, spirits, kakodemons, agathodemons) are aspects of our internal deity/true Self, that are externalised in order for our limited minds/consciousness to commune with them and transmute aspects of our psychosynthesis. It goes way further that just 'changing habits', it can transmute our soul on a quintessential level and thus attune it energetically with various aspects of the internal and external universe.

The fact that occult practices may lead some people to hellish existence comes from their own internal conflicts, fears, doubts, immaturity, weakness of personality/philosophy, mental issues and false dogmatism.

Lastly, there is no such thing as 'paranormal'; everything is according to universal laws and mechanisms. It is because we cannot or do not perceive or understand said mechanisms and laws that we brand certain phenomena as 'paranormal'.

It would be foolish of me, due to the experiences that made me, to say something different than: I don't merely believe in the paranormal; this energy is completely mixed within me; my existence is paranormal -- and I am just using this term because that's how you initiated this discussion -- not simply because the chances are odd, but the final production, which is my body, in each second, is powerful.

Be caring with yourself. There is a gigantic difference between understanding something and truly assimilating it; to understand the many concepts discussed in this sub is like explaining the horizon to a person that never left its prison, and therefore don't know about the outside world; assimilating those same concepts is finally leaving the prison, going out there to the highest mountain and seeing what the horizon actually is.

It takes more than understanding to actually connect with magick. One must feel it, otherwise it's just pretending and the universe knows the difference between "faking it

until you make it" and being awakened.

True inner power, at least from my small experience, comes from intuition, not books. It means that performing theatrical rituals just because it was written in an old book, might not be the best use of your power. On the other hand, performing random acts that popped from within while doing your own ritual, might unlock an immense amount of power without you even realizing -- and oftentimes not even being able to connect cause and consequence, so it just feels random.

Let's keep in mind that we are all different, so not everyone will connect with magick the same way. Some are indeed going to benefit a lot from ancient wisdom on books; others are meant to just keep perpetuating information and keeping it alive; and there are a few that are meant to build, unlock or remember new systems. Perhaps your current path is simply made for someone else and that's causing doubt. Try different approaches.

I wish you the best ❤️🧙‍♂️

I've experienced the paranormal. I've had Magical experiences that were definitely paranormal and I've seen ghostly activity. So yes, I believe in the paranormal.

It's complicated for me. I believe some stuff, but not all. In order to conduct some types of ritual, I often find myself having to "suspend disbelief" for it to work.

Belief implies that there's still an element of faith involved, meaning you haven't experienced the thing for yourself in such a way that you know it to be true. Some people believe in something higher because they were told by somebody they trusted. Others know that there is something higher because they have had direct experience of it.

I don't believe in the paranormal, I know the paranormal exists.

This is a great post. It really illustrates how post-magical revival ceremonial magic is on a spectrum between something-akin-to-psychology and mysticism. I'm glad you found mysticism and feel that will give you what you want.

It also illustrates how people come in wanting magic and get derailed by people telling them that all this is the real point of magic. It isn't. Those people are wrong. But they have been super prevalent for decades. I don't know why the late 19th and early 20th century had so many people trying to reframe magic as mysticism and psychology aside from a desire to be respectable and scientific. There were people engaged in more conventional magic at the time so the development of a "revival" that ultimately disconnected from traditional magic is a bit strange.

In any case, if you like mysticism, great. Pursue that. If you want actual magic, look at the grimoires/cunningfolk, some of the living spirit traditions, folk magic practices or pre-20th century witchcraft. You can do that and do mysticism and both will probably more directly get you to each of their goals than a hybrid glued together with various theosophies.

The post-GD approach is good as a training system. That's what it was intended to be. But as the tradition broke folks carried it forward as if it was the thing itself because what comes after the training system part wasn't as fully systematized.

If someone's life gets crappy while doing the LBRP, some of that is the general alchemical process that the Order of the Golden Dawn grades work through (successfully completing that work requires that you un-crappy your life) and some of it is probably a lack of real guidance and structure within the system which should help provide supports for dealing with that.

It depends on your definition of "paranormal", I suppose. Angels, spirits, deities, forces outside our comprehension? Certainly. I don't particularly believe in possession or ghosts or anything like that (though my mind is always open to change).

When I began ceremonial magick, I came from the POV of "it's all psychological", you change your habits, you change how you are. Psychological alchemy, in a sense. In more recent years, I've become increasingly more spiritual (also a Christian Mystic) and have worked on evocations which have made me not believe, but know, that there is something greater than us out there.

I go through ebbs and flows. What I usually see as paranormal at first usually just ends up being some kind of lesson I'm trying to instill in myself or the mindset I'm trying to achieve, but feel like I need "outside" help.

For example, I really wanted to apologize to a friend I wronged 10 years ago. It ate at me constantly, and I tried everything I could spiritually and mentally to push past it because I didn't want to enter this person's life to selfishly try and soothe my guilt.

One night I'm struggling really hard with the guilt, so I say out loud to "God", "Look I need some concrete proof here that all this work was worth it and this is the right path, or I'm gonna go off the deep end."

I'm usually not one to pick bargains with God and shit but I was at my limit. Long story short, I received a friend request from Instagram from that exact girl out of the blue, and when I apologized to her it turns out she didn't really care. Many, many worse things

had happened to her since and she just missed having me around. She was more upset that I disappeared than the fact I was shitty when we were young.

Basically, I was tormenting my own soul for years trying to achieve a spiritual penance I didn't even really need. I was an axe who remembered the tree that forgot. That in itself was a gigantic revelation though, and ever since I take any signs I get as guidance. I do have an OCD diagnosis mind you, so take all of this with that in mind.

Is it silly sometimes? Yes. Does my belief lead to positive changes in my life, mental health and spirit sometime? Yes, even if it goes the long way sometimes. It might be cope, it might be flat out fake, but I always find my way back around.

Do I believe in the paranormal? Yes and No.

Paranomal just means unexplained by empirical materialism aka "Science". It is a synonym of Supernatural.

So sure, I believe in the supernatural.

But the way a lot of people use the word "paranormal" in my experience is "ALIENS!" and conspiracy theories, and absolutely unhinged self invented maps with "Illuminati" symbols all over it, and rants about the black cube and how we are all in the matrix and NO, I don't believe in that.

I was raised in the occult fringe. My parents engaged with it, and their parents did too. My parents were pretty level headed about it. They didn't embrace weird diets, or drinking urine, and they also recognized that somethings were best dealt with very accessible and successful things like vaccines, and allopathic medicine. As an adult I

learned that my parents were often quite sensible about when it came to the care of their children, and also just following the law, whereas other parents in the same group were not that way.

I have had many experiences that cannot be explained by science. But I also know that magic and the occult doesn't magically create an easy life. Nothing does. It can help you move towards your goals, but wealth, lovers, and every fantasy you have ever mentally gooned to doesn't just fall in place from a single spell. That is what most people want coming to this, and when they finally figure out that is not how it works, they get disenchanted because it's not the shortcut they had hoped for. Because that is what they are looking for, a short cut.

I think most talk about the LBRP is useless. I think people actually miss the point that the LBRP is just that, lesser. There is a Greater and an Ultimate, and then those actually instruct you in Calling the Watchtowers, which is where magic that is goal driven is done. The rituals of the pentagram are just mnemonic devices so that by the time you start calling the watchtowers, you have the whole process memorized and you don't have to stop and start while peering at the pages of a book in candle light.

But that is just the golden dawn. There is much more. As you mentioned Christian Mysticism, which has plenty. But mysticism is for contemplation and people whose physical well being is already taken care of. They are either monks, nuns, or priests living in monasteries or rectories, or heirs of a fortune, or they intentionally choose to live in poverty or a very simple life, without most modern conveniences.

Whereas folk magic practitioners were all about getting money, solving love and marriage problems, driving away enemies, etc... Some of these people might even be monks or priests in some cultures, because their religion recognizes that the laity can't pursue enlightenment on an empty stomach, or while pining away for love. Usually in Western Culture, these things were separate. The local warlock or witch might really be a housewife or farmer, who while taking care of the house, and managing the agricultural business, the neighbors come visit because they have a reputation for being "cunning" *wink wink nudge nudge* and being capable of dealing with illnesses, or the lovelorn, or their cow suddenly not producing milk even though she just had a calf. But even these people knew better than to expect fireballs and lightning bolts and exploding heads.

The LBRP is absolutely used for banishing, and is useful for most low level astral critters.

The LBRP cleans the space The LIRP makes it holy

But also, the whole world has been turned upside down since 2019, everyone is going thru this right now.

Did you go thru a curriculum?

Modern Magic, by Don Michael Craig, is a very good primer.

Damien Echols's youtube and patreon are excellent as well.

Where you really see spooky action close up is in the evocation of spirits. (Which Craig covers)

He includes all you need to summon Lord YHVH, which you may know better as the god of abraham.

You're on the right track, these skills have excruciating plateaus tho.

I'm another one who doesn't "believe" in the paranormal; I KNOW it exists - a la Hamlet's line "there are more things in heaven and earth, Horatio, than are dreamt of in your philosophy."

But at the same time, I don't do magic to make life easier. Or at least, not for the most part, beyond a few minor cantrips and spells that don't upset balance, or that seek to correct what others tore asunder. I do magic to bring me closer to unity with ultimate godhead - whatever you choose to call the Divine. I have deities and powers I work with, but I know they are emanations of an ultimate, unknowable force. That is my goal; to eventually unite with that source of all.

If you're just trying to make your life on earth easier, you're thinking mighty small. But you do you.

Experiences/Reviews of Black Rose Witchcraft?

I'm considering this introductory course

(<https://www.modernwitchuniversity.com/black-rose-witchcraft/>) which seems a blend of Feri, Conjure and Traditional Witchcraft. I like the look of it but before dropping about \$400 I wanted to ask if people had honest feedback about the course. It seems that reviews of Black Rose Witchcraft are scarce compared to more popular occult courses - curious to hear people's experiences!

And if you took Black Rose Witchcraft, did you feel you needed to continue on to their next level Feri program or did you take the teachings of Black Rose Witchcraft and merge it with something else? How does it compare to other popular occult courses? Thanks!

Pay \$400 on a course if you really like the teacher and want to support what they're doing. Do not expect to get \$400 worth of magical education. If your expectations are exceeded, awesome.

8

TheSchizScientist

•

1y ago

the best teacher is experience. for \$400 you could buy a plethora of books (or a shit load of rum while you torrent pdfs) and learn/practice what you want. everyone has a different value of things but someone charging 400bucks for a course in anything sounds like a scam. "for only \$400, i can teach you how to make money off your friends"

8

Manicwoodchipper

•

1y ago

99.9% of people charging to teach you like that are either scam artists or they're giving you information you could get from a \$30 book or for free online for hundreds of dollars. If you want to learn from people, try to connect with people in your area or online. There are plenty of people who will help just to help. Otherwise spend the money on books and explore things on your own.

6

[deleted]

•

1y ago

If you want a structured introduction to a magical tradition so you can develop basic skills in a guided manner, then Thelemic Union has an introductory course to Aleister Crowley's theory of magic(k) for \$93. (Inb4 Crowley was xyz, everyone knows he was a dirty bastard but that doesn't change the fact practically all modern occultism is downstream of him, even if people want to ignore that fact.) You can adapt the actual readings to whatever you'd like.

Otherwise, LibGen and Anna's Archive give you access to practically all books ever published. Start there and keep your money.

4

SilentiumNightshade

•

1y ago

I'm not in it so I can't give reviews of the course material, but I can dispute the claims it's

a scam.

Some of the teachers are well known authors. Devin Hunter, Storm Faerywolf, and Chas Bogan. I believe Mat Aurn is also a member, though I'm unsure if he teaches there or what his "rank" is.

Whether you're getting \$400 worth of value is up to personal opinion, but it's a pretty average price to train under at least three well known occult authors. The Temple of Witchcraft (with Christopher Penzak) and Jason Miller's Strategic Sorcery classes can also be a tad up there in cost.

3

kalizoid313

•

1y ago

I can say that the teachers named on the website are active, dedicated, accomplished practitioners with years of involvement in Craft and magic. They have useful practices and understandings to teach.

If the tuition is within somebody's budget, then I think that it is worthwhile spending on magical skill building and Craft practice.

As someone who has read the teachers books, i think it's actually a good deal. If you pay in advance its 26 per month for 13 months. 4 lessons oer month at \$6.50 per lesson. These people record videos and send lessons. Their time is worth that amount of money. Im currently taking a \$100 per month course by jason miller and im learning more than i ever learned in his books. Invest in yourself

Seen in a dream

r/occult - Seen in a dream

I've been having a lot of dreams lately about a woman who either shows me sigils, leaves them written on things or puts them permanently on my body. Last night I dreamt that I was in a water rapid heading towards a water fall and she said she'd pull me out if I agreed to be hers. I agreed and this was permanently on my chest. Any ideas?

Were you in a cave-like setting, or were the rapids open air? Any additional, relevant details to this or other dreams?

If you use divination or practice visionary magic as part of your practice, I'd try either one of those methods to decipher who or what you got in contact with, and why. The

sigils may be keys you can use in magical workings (provided you do any such workings) but you'd need to figure out on your own how and for what purpose.

Not in a cave just open air and woods all around me. I posted the other two dreams I've had of her in a comment below. I don't use divination yet. As far as visionary magic I do shadow work from time to time and I usually go into a trance and have visions in not sure if that counts. I don't do magical workings yet such as rituals or spells etc but I'm working towards it slowly

I just read the two other dreams. I think there's a lot to unpack, actually. So here's a couple questions, you don't have to answer to me necessarily, they're more things to think about:

What's going on in your life at this time? Is it a time of drastic change (changing jobs, moving to another place, changes in your relationships, a loss of someone dear to you...), in which case these dreams may be psychological, and a bit of shadow work or psychological pathwork could help. You might be going through a lot and the lady might be this destructive wave, or a part of you that you're trying to come to terms with. If on the other hand nothing big is going on, you might be picking up on some energy current outside of yourself, or some sort of being might be trying to come in contact with you.

How do these dreams (or the lady specifically) make you feel? I've noticed that despite her explicit power over you/the situation, she sort of shifts from curser to savior, and all throughout she seems like someone who can oversee and decide your fate. Either way, I'd suggest you don't let this situation overwhelm you, as strong emotions can quickly do more damage than the dreams themselves, be they psychological or magical. Even if it is some kind of being that's trying to scare you, the best thing you could do is simply not let it scare you.

Something I would do if I were you, is record the dreams and the symbols in a notebook, and maybe meditate on the symbols to see what comes out, if anything does. If this turns out to have magical relevance, once you'll get to work in a ritual setting you might be able to use them, but there's no rush in that: if that door has opened for you, it'll still be open when you come to work magically in accordance to your natural

development, and you'll be stronger and more knowledgeable by then.

Good luck on your path

Just from a visual interpretation, that looks like a mountain with a pool leading to a waterfall on it. Though it could also be an up-arrow or even alchemical fire symbol with a shepherd's crook.

I'm not as knowledgeable as most here about the various forms of sigils, but from a personal experience of trying to make sense of sigils that pop up to me from time to time

This feels like something to bind, as you said it was related to her The point reminds me of the fire alchemical symbol but incomplete, like, something is hooking onto you, to your core, lets say to the fire of the soul, in an attempt get power but also help Somewhat of a trade off

I've had something similar happen to me except, it claimed me when I was like 7-8. Just a brand on my wrist glowing golden yellow. I didn't consent 😊

The entity who gave me that brand had a voice of man and woman, but it didn't reveal its identity to me though. My first encounter in a long time took place 1 month ago.

Apparently you're being tested. Keep in mind that whatever you agreed on isn't bonding,

so keep an open mind in this regard. If this woman keeps appearing in your dreams, you might be dealing with a mentor who's willing to follow your evolution, but if you realize that such presence is meant to damage you, get rid of it any way you know how without feeling compelled to stick to any previous agreement. There is no bonding contract in the spiritual world. It's all based on will.

This particular sigil makes me think of the Temple's door. It appears to describe a "descending" path toward the depths of Earth. It could be either "Infernal" (if you depict it as Inferus - underground) or Elemental/Alchemic (where depth means initiation through the knowledge of matter)

I would say it was a very very good dream. From it I can see that you were being dragged by circumstances of life or egoic mindset to an empty and boring life. The woman in your dream represents your soul rescuing you from your terrible destiny. She will guide you to a beatiful and adventurous life if allow to. You two are more close now but still apart. I would say that you should listen to her more when awaken, she's defenitly speaking to you but you are not paying attention

I wish the best luck in your new life ahead!

Downloaded 900GB .rar archive, stuck at 99.9%

A few months ago on r/DHExchange, a user posted a 900GB torrent that was his giant collection of esoteric and occult themed content.

I've was in contact with him months ago, but long story short that user is now MIA, and myself and multiple bittorrent peers are stuck at 99.9%, only a couple hundred MB left needed.

I can open it with 7-zip (there's some pretty interesting stuff in there), but I'm concerned some of the files are going to be corrupted so I don't want to officially put it on my NAS and forget about it.

My question is- is there any way to recover this file without having that last <.01% of data? Or what exactly could missing <.01% do to the contents of an open-able .rar file?

Not sure where else to turn, any help would be appreciated.

.

edit:

I ran right click > 7-zip > test archive, and it ran a test. The only errors it found were a header error, and a single .mp3 file.

results

That file is only 73MB. Does that mean everything else downloaded in the archive is healthy, but the remaining ~400MB of stuff is simply missing?

Hey, it's esoteric occult material. Maybe it's meant to be corrupted, and there's a dark ritual necessary to decompress it.

If you unzip it with 7zip, it will tell you what's broken / not complete. Any part that unzips successfully without errors relayed from 7zip has passed the checks and should be fine.

Unless it has a par file (unlikely) or something similar, no way I know of to fix the file as a whole.

That does seem to be the case. I ran right click > 7-zip > test archive, and it ran a test. The only errors it found were a header error, and a single .mp3 file.

Hey OP, I think you should be good. Check where in the file you have missing pieces (beginning, middle of file) your best bet would be to have to verify which files aren't corrupt. Seeing you're missing .01% of your torrent most of your archive should be good

11

Aquifel

•

8y ago

Hmm, it looks like there was a part likely missing from the middle, and it didn't know how to continue past that. Usually in my experience, it can figure it out and work past it, but I guess we didn't get completely lucky in this case. Anything in the resulting directory besides that mp3 file mentioned should be fine though.

There are programs out there that can repair rar files which probably wouldn't be able to restore that above mentioned mp3 (since really, part of it is just missing), but may be able to get you access to some of the files that came afterwards. May have to download

rar proper and bust out the terminal, but you might try the suggestion here:

RAR (and indeed most archive formats) store CRCs for every file within. During unpacking (or test) these are verified. It will tell you if anything is corrupt.

The recovery system is built in - if they used it. From the help screens on winrar...but works the same on the Linux version. A 10% recovery record can repair about 10% of damage.

Command R - repair a damaged archive

Archive repairing consists of two stages. First, the damaged archive is scanned for recovery record (see the rr command). If archive contains the previously added recovery record and if damaged data area is continuous and smaller than error correction code size in recovery record, chance of successful archive reconstruction is high. When this stage has been completed, a new archive is created, named as fixed.arcname.rar, where 'arcname' is the original (damaged) archive name.

If damaged archive does not contain the recovery record or if archive cannot be

completely recovered due to severe damage, second stage is performed. During this stage only the archive structure is reconstructed and it is impossible to recover files which fail checksum validation, but it is still possible to recover undamaged files which were inaccessible due to a corrupt archive structure. Generally this is useful for non-solid archives. In a damaged solid archive, often, only the first file may be recovered during the second stage. This stage is not performed for archives with encrypted file names, which can be repaired only if recovery record is present.

When this stage has been completed, a new archive will be created, named as rebuilt.arcname.rar, where 'arcname' is the original archive name.

By default, repaired archives are created in the current folder, but you can append an optional destpath\ parameter to specify another destination folder.

This command is the command line equivalent of the file management command Repair archive.

Example repair buggy.rar and place the result to 'c:\fixed' folder

```
WinRAR r buggy.rar c:\fixed\
```

OP

I just got around to seeing your response but yours was definitely the most thorough one here, thanks!

Sadly, I don't believe that this uploader added any sort of recovery record. I downloaded winrar (apparently 7zip doesn't have this feature), ran the 'repair' command, and it's given me this response thus far:

```
Esoteric Library.rar
```

```
Detecting archive type...
```

```
---> RAR
```

```
Build G:\repair jobby\fixed.Esoteric Library.rar
```

```
Searching for recovery record
```

```
---> recovery record not found
```

```
Build G:\repair jobby\rebuilt.Esoteric Library.rar
```

I'm assuming it's building the second 'rebuild the archive with only undamaged files' step you referenced in your explanation- luckily this archive is built largely of thousands of PDFs rather than anything larger, so it has a good chance of recovering the vast

majority of it.

My only problem now is that I have no idea how long this is going to take- winrar doesn't give any sort of status bar or MBps, and the HDD it's on has been at 100% usage for the past two hours. Even if it takes a few days that's okay, but with a file this large I wouldn't be surprised if it ran continuously for much longer than that.

Thanks again for your response.

1

[deleted]

Sorry then...your winrar efforts are probably useless. Rar isn't magic. That recovery record must be included. It is a mystery why this torrent publisher left it out. Indicates a serious lack of self doubt that he failed to include something which might have provided an "over"? Hubris.

Perhaps it's time to return to your torrent software to see if it can fix the file. Most of those products have a "verify" function. That's your last hope.

If he included a recovery record, the file will fix itself if you initiate the recovery procedure.

If he didn't, some of your files are toast.

1

cgimusic

There's unlikely to be PAR files for a torrent. It would just be a waste of bandwidth since torrents have checksums built in.

OP

•

Where would the .par be? Just in the same directory as the .rar itself?

2

Aquifel

•

Par files are more common with things downloaded from Usenet, would be rare and kind of odd to see one for a torrent. It would be a separate file likely in the same directory if so.

Ancient Magic Books That Still Exist

Real or not, this subject has always interested me. I am talking about ancient books, occult books, spells, demonology and all this sort of knowledge and the book on the subject.

So, I want to share with you this interesting YouTube video that features 4 ancient magic books that still exist, a few copies left and are stored in preserved places.

Some say they are a hoax, others are written in an unknown language and there's even a debate in which order one book in this video should be read.

Just for fun, how do you think about this subject? Do some of these books interest you?

I know I always wished I could be like Johnny Depp in "The Ninth Gate", searching for ancient, mysterious and rare books.

:-)

Here's the link to the video.

<https://www.youtube.com/watch?v=RRHioHn3nWw>

Have a great day!

You might enjoy the Hermetica. Actually, for mention of a great number of texts, and a bloody good story, you should try Umberto Eco's Foucault's Pendulum.

There are ton of ancient magic books and spells that "still exist" ...

Gager Curse Tablets and Binding Spells from the Ancient World

Kotansky Greek Magical Amulets

Meyere and Smith Ancient Christian Magic

Reisner Amulets

Betz The Greek Magical Papyri

Daniel and Maltomini Supplementum Magicum

Borghouts Ancient Egyptian Magical Texts

Brashear "The Greek Magical Papyri" ANRW

and that's just some of the scholarly works that are in English and are book length...

Then there are the entire databases dedicated to this like the PGM and PDM, papyrologica graecae and demotica (respectively) magicorum

What was magic like in ancient cultures? Today, when we think of fantasy shows with magic, we think of fireballs and lightning bolts, perhaps making people levitate, etc.. But what did people used to think magic was? This is a broad question of course, I'm interested in all cultures!

Looking to build up a library of occult books out of curiosity, any suggestions?

If there's anything I love it's books and the weird things. And so I would like to start collecting books on the subject of the occult to add to my growing personal library.

Anything from publications of ancient religious texts, grimoires, histories/biographies of occult orders/practitioners etc, you get the picture. All suggestions are welcome and appreciated, or if there's a link to a thread I missed dealing with this sort of thing that'd be appreciated also, cheers!

Please don't down vote me to hell. I would like to suggest that any open minded, serious student of the occult would do well to begin with the works of skeptics. Rather than dismiss the works of persons skeptical of the occult, at least read them to assist you in being a more discerning pupil of occult tomes. Clearly, not all of books written about occult matters can possibly be true, especially considering that many of them contradict each other to the point of being mutually exclusive. So, how can one avoid reading patently false information as truth? Start by reading some of the book reviews written by skeptics.

I hope im not downvoted for this, but Some unusual recommendations I would suggest are Illuminatus by Robert Anton Wilson, The Invisibles by Grant Morrison, and From Hell by Alan Moore. They're all works of "fiction" but will change your view on some things and get you interested in other forms of the occult.

-

Nah man you get an upvote for mentioning Illuminatus for sure :)

Sure, it's a work of fiction, but really what does that mean? In the end, isn't it all philosophy, one way or the other?

So, do you want to have a specific aesthetic or a general interest?

If you want an aesthetic, I understand, and western occultism to me looks more aesthetically "magical". Vodun/voodoo particularly New Orleans style comes at a close second.

If you have a general interest, I recommend starting with chaos magic and working backwards. People talk about bullshit like logic and consistency, fuck that, this is magic not science. Science works with logic and is collectivist in that it works for everyone. Magick is illogical and individualistic and works only for those that use it. So, start with chaos magic and then start working on "traditional" magic styles like Thelema, Buddhism, Freemasonry, etc.

5

u/part_time_mind avatar

I highly recommend starting with any book by Gary Lachman. While he isn't a practicing magician, he is an expert writer/researcher on the occult. His writing style is excellent and makes the esoteric accessible to anyone interested. I think it will get you excited about the ideas, history, and cultural influence behind the practice, whereas the more "instructional" books might read like a toaster manual for someone not interested in practice.

The Book of Thoth is the single most useful occult work I've found so far... Not that it's very easy to process... Occultists are notorious for ubfuscating their work.

People also keep telling me to get Bardon's Initiation into Hermetics.

Research Thelema. If you have a hard time finding out where to start, let me know. I am just learning and not a part of O.T.O. or any related orders, but if you want occult illumination, this is it - and there are TONS of related texts, old and new, rare and common. Part of the journey as I understand it is navigating your own way through the texts and getting a good feel for everything as you go.

If you want spooky fiction around, get Lovecraft stuff. You can get some pretty neat collector's versions of his stories with neat bindings just like many other classics that are now in the collective commons.

This blogger just stopped, and I believe is primarily based on Franz Bardon.. so Initiation Into Hermetics. HOWEVER, in this specific last-post he mentions quite a few books.

His second one "New Energy Ways" by Robert Bruce is less Occult in terminology, and like IIH, heavy in practice. I read a part of this "before" discovering IIH and it had

for-sure effects, so it's amazing to re-discover it(I forgot and lost it) full-circle, seems Synchronicity-ish to me personally.

<http://justinbthemagician.blogspot.nl/2017/06/good-night-and-good-luck.html>

I'd also like to recommend Jerry Alan Johnson's Qigong & Taoist Magic books, though I've only really read most of his "Chinese Medical Qigong Therapy" Vol. 1 (2 and 3 sound like where it's at though, 1 is anatomy primarily).

The symbol in the center relates to the desired outcome/the entity being conjured to

produce the outcome, the Theban script around it is the name of the servitor being conjured/instructions on how that action is meant to be played out. Its like a script with the lines that are being read by the actor in the middle - a mysterious play, if you will

33

[deleted]

OP

•

3y ago

So it's basically an explanation of what the sigil is to a being completing the task? So if I made one I could write instructions to the angel I am asking for help? And what does that mean for angelic sigils? What's the writing for on those?

Look up the book Sigils, Ciphers, and Scripts by M.B Jackson, its a great resource for various magical writing systems and likely will answer a lot of your questions

I'm more asking about why is the writing there and what should be wrote there. Is it like how to activate? Or is information about it?

1

•

3y ago

I think your question is more about sigil design as opposed to knowing exactly what it says.....correct? I use a sigil writer I found years ago and he creates the actual sigil and then fills the empty space with any of the following; words, mini sigils, drawings, images, colors etc. He uses his intuition to add to the sigil itself anything he feels will empower it. That can also be empty space. Once I got one from him that was 3 lines and nothing else. When I asked, he said, 'it's complete just like that. It doesn't want anything more.' You decide what goes where.

I checked out that persons instagram (marsmensch) and they have a phrase for each sigil. they could be using any number of ways to make the main center sigil. "I am strong" was one I saw, so using the duplication/vowel method that leaves "mstrng" then mapped out.

Now as for the symbols around, they seem to normally use an angelic script, but in this case alchemical symbols. I would assume that these encircling symbols relate to the center sigil in a specific purposeful way.

using the above example "I am strong" perhaps you'd want to call upon Mars energy etc and then use the appropriate words. So to find the answer you're looking for, perhaps it lies in the associated sigil sentence

There are plenty of steganography and decryption programs available that can run the cipher through every known encryption package, obviously starting out with zodiacal symbols, Solomons lesser keys, and everything in the occult/ religious ciphers would be a first step. And it will run loads way faster than doing it by hand.

I would suggest hitting up Reddits steganography, cryptography analysis and deciphering boards first. Figure out what you want, learn the names of the programs already available, and download or torrent it.

If you hit a barrier and need help just message me, I'll do my best.

Happy Hunting!

Have you tried transliterating it for a start? Theban to English letters is pretty straightforward. You can find it in Agrippa's 3 books and in the The Sworn Book of Honorius ..and of course on the internet in a google search.

If the sigil is a personal one and not an angel etc, then you will likely only get the jumbled text after the creator reduces the request down.

Yeah I have transliterated it (come to think of it that's the better word to use) but maybe I should try to translate an Angels circle and see what it says

Yeah I substituted some the letter clockwise starting from the symbol of mercury.

A I (or) j D U (or) V M O D G N.

I do not feel the need to translate the rest of the letters if its gonna look a random like this.

So no I don't know what it means

That's what I'm saying...could it be a cipher? And we need the correct phrase to change jt

So the issue with these sorts of things is first of all the outer ring might not be words at all. It could have once been words but through a cipher has become obfuscated. The inner part is usually done using magick squares. So without knowing which magick squares were used to generate them it's hard to interpret what they might mean. I can say that it reflects a ceremonial style. Is more than likely a planetary seal drawing inspiration from solomonic magic. generally these are used as amulets to draw certain influences to the wearer. However they are also sometimes used in invocation magick as well.

There's a wikipedia page on it under "theban alphabet" it's a substitution cypher on the Latin alphabet that's been around since the 13th century. A lot is known about it.

3

[deleted]

OP

•

3y ago

Right but what's the purpose of it around the sigil. When I put it into the Latin alphabet it's jibberish

2

zombiescottsman

•

3y ago

It is common to scramble the phrase letters to hide the intention, as a skilled magician can alter its energies. The chaos puts its meaning into question, protecting the sigil from influence. An especially good idea when releasing the sigil to the internet.

It's to empower the sigil further the words stand for it to use and purpose and serve to carry it out more effectively than if the sigil was by itself

A Former Occultist Finds Jesus | My Testimony

This article was posted under r/occult a few seconds ago, so bear in mind the audience of the original post. I wanted to share how exactly Jesus touched my life, and made me clean. I need a few brothers and sisters in Christ to fellowship with for the mutual growth of our faith and a warm friendship indeed. Proverbs 27:17: "Iron sharpeneth iron; so a man sharpeneth the countenance of his friend."

First and foremost, I am not here to debate with any one of you as I have already branched out of the occult and am aptly satisfied by the nourishment of the vine of Christ. My life has radically transformed in a few short weeks since my redemption -- being washed clean by the baptism of the Holy Ghost -- far from the torment and anguish of the evil spirits who made their abode inside my body. And I admonish those who stand to argue that a sulfur-and-cigarette smelling spirit is simply an "energy" from a better dimension, acting in the behalf of God, when it's glaringly obvious that these demonic beings are straight out of the synagogue of Satan. No, I don't desire to spend my time rehashing something I have already endlessly debated within myself, when I was grasping at straws trying to justify something so evidently evil and wicked. So despite the infinite number of occultism's fronts and the crooked paths it walks, it is rooted in a power source that is diametrically opposed to the LORD God and hostile toward other related faiths. Need I remind all of you of Jesus' multiple post-resurrection appearances to five-hundred "brethren" of Paul the Apostle (1 Cor. 15:7) and Paul himself on the road to Damascus (Acts 9)? Christ himself, in a rather noble, sensible, and uplifting act gave up the most important thing he had to bridge the gap between mankind's imperfections with the holiness and love of the Father. And that sacrificial act

is a constant reminder that good and evil are not one and the same.

I cannot express how truly dangerous the occult is, and I am reaching out to those of you with a vestige of conscience buried under the rubble, and to the courageous seekers who want something deeper and more fulfilling from a cherishing, Creator God who loves you in spite of the inevitable shortcomings we face. Nesting a few small seeds of faith under good soil in anticipation of the Lord is as simple as grabbing a copy of the "Good Book" and learning from an immutable God who seeks to share a unique bond with human beings while protecting them from the cosmic forces of darkness. And that book is described fully in John's gospel: "And the Word was made flesh, and dwelt among us, (and we beheld his glory, the glory of the only begotten of the Father,) full of grace and truth. It serves no purpose to have dealings with deceptive and demonic forces that string you along like a puppet in the name of having power over other people tied to the pursuits of this world. You are not God, and all branches of occultism are successful in fueling your ego into believing that you are and should be feared. But it's not the case: and those who defile their spirit with abominable, devilish spirits are those that face a torrent of fear and restlessness daily (Isaiah 48:22 writes: There is no peace, saith the LORD, unto the wicked.)

Drawing up pathetic sigils and flipping through the pages of a grimoire brings you no closer to filling that vacuum-sized hole in your heart that cleaves for the LORD God. For it is written in the fifth chapter of Mark's gospel, "And he arose, and rebuked the wind, and said unto the sea, Peace, be still. And the wind ceased, and there was a great calm." Isn't that the most ardent desire of the beating heart inside all of us -- a gap that can only be filled by the Holy Spirit of God, who proclaims His presence, "Be of good cheer: it is I; be not afraid"? My friends, there is no measurable incentive for me to write this letter unto you: but I am doing so because I know all about those spell books, and the power supplied by unclean spirits who talk out of the dust (Is. 29:4); I had everything I could ever dream of and more, but my personality was subsumed by the darkness I had allowed into my life. It wasn't long before I morphed into this foul spirit (a problem remedied by Jesus Christ). I also knew intimate details about people's thought patterns and sin, made a mockery of God (and hated what He stood for), and became an empty vessel where the man in the captain's cabin was unrecognizable. And the spirit of suicide attempted to take my life several times: Precisely, why would the Holy Spirit of God -- or another "benevolent" spirit -- foment the thought to bring harm upon yourself? The simple answer to the question it was an evil spirit spawned from the devil himself; scoffing, huffing-and-puffing makes it no less truthful.

And finally, lending an ear to the prophets of evil who exist now and those from previous centuries (one such initialed A.C. wrote that he desired to be his "chief of staff") have propagated the lie that there is no personal devil, but merely an impersonal, deistic 'blob' of energy that somehow allots to a few chosen light-bearers who are tasked to raise the consciousness of the whole world. My oh my, how the tables have turned: that sounds awfully similar to a personal deity with ambition and a will (that will assuredly attempt to overthrow the Lamb; "[but] the Lamb shall overcome them: for he is Lord of lords, and King of kings: and they that are with him are called, and chosen, and

faithful.") (Rev. 17:14) But there is hope to be had beyond the dead-end street of occult insanity and darkness; there is a light at the end of the miles-long tunnel (John 1:29). Christ is the gauze inside of your first-aid kit; the loving good shepherd who will comfort and heal you, as John writes in his gospel: "I am the good shepherd: the good shepherd giveth his life for the sheep. [...] And other sheep I have, which are not of this fold: them also I must bring, and they shall hear my voice; and there shall be one fold, and one shepherd." You see, I thought there was no hope for me before I was saved -- and I was convinced the night before it happened that, as my mind and soul were plagued by demonic manifestations and voices, my condition couldn't improve and I would subsequently lose my mind. The LORD tossed me a lifejacket in spite of my innumerable sin and blasphemies that sunk me further and further into the mire. My enemies in spirit were great in number, and I parallel these experiences with the writings of King David in Psalm 69:4;21: "They that hate me without a cause are more than the hairs of mine head: they that would destroy me, being mine enemies wrongfully, are mighty: then I restored that which I took not away. [...] They gave me also gall for my meat; and in my thirst they gave me vinegar to drink."

But remember, greater is he that is in you, than he that is in the world. And for this cause your heart will live that seek God. The LORD will search you, and replace your heart of stone with a heart of flesh; and supply that water unto everlasting life, instead of the false fountain that yields salt and freshwater. It is pure -- straight from the rock of God. Take it from me, a former occultist: He will never let you down. Let the wisdom of the God rule within the walls of your heart, as penned in Proverbs 3:19-22: "The LORD by wisdom hath founded the earth: by understanding hath he established the heavens. By his knowledge the depths are broken up, and the clouds drop down the dew. My son, let them not depart from thine eyes: keep sound wisdom and discretion: So shall they be life unto thy soul, and grace to thy neck." Wisdom from God is more valuable than rubies, and is weaved throughout the Bible in formats that can be applied to different areas of our life. Such is of critical importance as pertains to James 4:7-8: "Submit yourselves therefore to God. Resist the devil, and he will flee from you. Draw nigh to God, and he will draw nigh to you. Cleanse your hands, ye sinners; and purify your hearts, ye double minded." There's no need in mending the Bible's wisdom with the wisdom of a corrupt world.

Here are some resources that have helped me on my journey out of the occult, and will provide the bread you need to cultivate your relationship with God:

I think one of the most important things any practicing or aspiring occultist should know, if not THE most important, is this:

Rending the veil and having a visionary/transcendent experience is the easy part, it's coming back down to earth and integrating it in a healthy manner that's the hard part.

Cracking open your third eye, awakening your Kundalini, stepping into the abyss, etc. etc. etc. that's all the easy part. Anyone, and I mean anyone who wants a shortcut could rock up to their local Greatful Dead cover band and score a heroic dose of DMT (or some similar drug) and then blast themselves up into supernal transcendence. The truly difficult part is the required physical/mental health and groundedness needed so that you can come back down to earth safely and apply what you learned to useful ends. Otherwise, best case scenario is that these experiences just inflate your ego and end up being self-defeating to your goals, and these holy visionary moments become their own addictive escapism. Worst case scenario is, well, gaining a very intimate understanding of the failings of your local mental health medical care system.

I don't say any of this to frighten or to vilify drug use or shortcuts themselves. Rather I just want to impress on others the sheer necessity of having a strong foundation, and the only way to gain that is through regular and consistent practice. Chop wood and carry water.

Occultism doesn't pay the bills ... unless you're one of those few individuals who makes a living writing books on it, or selling bling and supplies. Or I suppose if you are very successful at wealth magic. But otherwise there is no money in it.

There are so many occultists I know who seem chronically underemployed or unemployed and have problem making ends meet. Don't lose your life in this stuff.

Coltrane_45

-

4y ago

Thank you. My friends that practice wealth magick are two of the most broke friends I have. I'm not going to say it doesn't work, because the amount of coincidence and opportunity that comes into their lives strikes awe in me. The thing is, in order to make money, you have to spend a lot of time working on actually making money. The material world has rules that need to be respected if you want material results

47

JaneAustinAstronaut

-

4y ago

I'm always telling folks that if you don't follow up a magickal working with mundane actions (or worse, your mundane actions counteract the magickal working), then you are wasting your time. Don't do a love spell and then never try to meet people. Don't do a job spell and never put out a job application. Don't do a cord cutting, but then talk to the person who you are trying to get away from.

Foundational texts. A lot of occultists read obscure titles then foundational texts. e.g. Please read Franz Bardon and not EA Koetting's crew's texts.

Yes. I have mixed feelings about Franz but that EA Koettings how to become a living fraud is 110% bs.

If you want to learn how to work with plants, get out to a forest and become one with it. Make friends with the genius loci of the forest, invoke the Green Man who rules all forests, talk to tree nymphs, leave offerings to the plant devas, do your part to pick up trash & refuse, show the Gnomes of the Earth element you desire to learn more about their realm and children and keep at it until you begin to have the dreams where they come to you and start whispering things in your ear or they start talking to you while meditating under a big old tree. Write your info in your journal. Ask them to teach you their songs, chants and prayers. You will not need any occult books on herbs because you will soon have all of the plant information needed to heal, succeed or kick some butt.

Non occult general knowledge. Specially "traditional" science (math, physics, history...) and regular philosophy. You can't achieve great results if you don't understand how the world, as a whole, works. Also: the importance of a good physical health, both in magickal life and in non-magickal life

80

Dunworth

-

4y ago

Definitely agree with this, although there are a lot of people that learn just enough to fall victim to Dunning-Kruger and never seem to move past the first hill of, "I learned a little about something, so now I'm an expert." The wider vocabulary that you get when you learn about that stuff helps a lot with more abstract concepts though, so I think it's a net positive as long as you don't let ego get in the way.

18

Armchair magic is bullshit. If you want results go and actually do shit. Sigil, ritual etc. You can read about it all you want, but without actually doing something you won't get anything.

Physical activity is good. Obviously it's good for you physical health, but from a magick perspective it's immensely helpful. Pick up something like Yoga or Tai Chi or jogging.

72

troublemaker74

-

Back when I was really into sigils, I would lift weights to exhaustion and then look at my sigil to charge it in that state. Results were actually really good!

That magic was invented before they were born, and there are teachings and techniques in languages other than English that English-speaking occultists by and large have never heard of. It's embarrassing how many people seem to think that the very narrow range of magical techniques popular in the present and the very recent past are the be-all and end-all of magic.

I think everyone should be less concerned about rituals and spells and Demons, and start searching for real OCCULT TRUTH, which you cannot notice or find if you aren't both cautious and open minded, nor if your purpose is a selfish one and not sincerely committed in seeking truth.

Pretty much everything from Blavatsky forward is just spicy psychology and not even good psychology at that.

The more vague and grand pronouncements that someone makes, the less likely it is that they have any idea what they are talking about.

Magic is a lot older than Regardie or Crowley. You'll get a lot farther reading Agrippa and the Greek Magical Papyri than you will by reading some Victorian Era take on the tree of life.

Maybe a cloud like MEGA, Google Drive or any other.

I would suggest the internet archive but they've been having some ridiculous legal issues so while I'd still upload to them I'd also archive them in torrent format and post of mega as well. Maybe ask in the datahoarders subreddit for more ideas.

600 GB corpus of all paywalled scholarly sources of Wikipedia

Scholarly publishing is a racket where research entities pay all the costs for the outputs but publishers seize them for free and get the same research entities to pay exorbitant prices to rent them back. In an open publication like Wikipedia, two thirds of the academic sources are paywalled, although many are green open access (archived by open repositories).

A torrent has been compiled from various sources to provide a corpus with nearly all such paywalled papers for Wikipedia in all languages. It contains about 561k PDFs for as many DOIs, divided in 1529 ZIP files for a total of 600 GB. The archives are sorted by publisher (DOI prefix), so you can download just what you can or are most interested in. There's a list of DOIs inside.

The corpus is only for personal and research use, for instance to help text and data mining and any other effort which requires fast or bulk download.

Please preserve a copy and seed! The info_hash and magnet link are:

I'll definitely be downloading this. It's a good start to mirroring the vast library that sci-hub has.

Any downloads for studies not cited by wikipedia? Does sci-hub share their set?

26

[deleted]

OP

-

7y ago

There's a lot of stuff out there, the problem is how to make a mirror usable and sustainable.

LibGen torrents are probably the biggest collection (20+ million?).

Internet Archive's journals collection is the easiest to download individually (almost 2 million, mostly public domain).

CORE datasets have full-text (unformatted?) for almost 10 million articles (mostly with some Creative Commons license?).

u/pbjandahighfive avatar

As far as I am aware sci-hub doesn't actually have anything saved on their servers. What they do is source login-credentials from people who attend/work for various schools and colleges across the world (because a lot of school pay subscriptions to the various journals so that the students attending can access them as needed) and then use their subscriptions to generate on-demand access keys to the various scientific and medical journals which the person then downloads from.

600 GB corpus of all paywalled scholarly sources of Wikipedia

Scholarly publishing is a racket where research entities pay all the costs for the outputs but publishers seize them for free and get the same research entities to pay exorbitant prices to rent them back. In an open publication like Wikipedia, two thirds of the academic sources are paywalled, although many are green open access (archived by open repositories).

A torrent has been compiled from various sources to provide a corpus with nearly all such paywalled papers for Wikipedia in all languages. It contains about 561k PDFs for as many DOIs, divided in 1529 ZIP files for a total of 600 GB. The archives are sorted by publisher (DOI prefix), so you can download just what you can or are most interested in. There's a list of DOIs inside.

The corpus is only for personal and research use, for instance to help text and data mining and any other effort which requires fast or bulk download.

OP

There's a lot of stuff out there, the problem is how to make a mirror usable and sustainable.

LibGen torrents are probably the biggest collection (20+ million?).

Internet Archive's journals collection is the easiest to download individually (almost 2 million, mostly public domain).

CORE datasets have full-text (unformatted?) for almost 10 million articles (mostly with some Creative Commons license?).

As far as I am aware sci-hub doesn't actually have anything saved on their servers. What they do is source login-credentials from people who attend/work for various schools and colleges across the world (because a lot of school pay subscriptions to the various journals so that the students attending can access them as needed) and then use their subscriptions to generate on-demand access keys to the various scientific and medical journals which the person then downloads from.

How one young woman broke down the gates of knowledge

By George Monbiot, published in the Guardian 13th September 2018

Never underestimate the power of one determined person. What Carole Cadwalladr has done to Facebook and Big Data and Edward Snowden has done to the state security complex, the young Kazakhstani scientist Alexandra Elbakyan has done to the multi-billion dollar industry that traps knowledge behind paywalls. Her pirate webscraper service, Sci-hub, has done more than any government to tackle one of the biggest rip-offs of the modern era: the capture of research that should belong to us all.

Everyone should be free to learn; knowledge should be disseminated as widely as possible. No one would publicly disagree with these sentiments. Yet governments and universities have allowed the big academic publishers to deny these rights. Academic publishing might sound like an obscure and fusty affair, but it uses one of the most ruthless and profitable business models of any industry.

The model was pioneered by the notorious conman Robert Maxwell. He realised that, because scientists need to be informed about all significant developments in their field,

every journal that publishes academic papers can establish a monopoly, and can charge outrageous fees for the transmission of knowledge. He called his discovery “a perpetual financing machine”.

He also realised that he could capture other people’s labour and resources for nothing. Governments funded the research published by his company, Pergamon, while the scientists who wrote the articles, reviewed them and edited the journals did so for free. His business model relied on the enclosure of common and public resources. Or, to use the technical term, daylight robbery.

As his other ventures ran into trouble, he sold his company to the Dutch publishing giant Elsevier. Like its major rivals, it has sustained the model to this day, and continues to make spectacular profits. Half the world’s research is published by five companies: Reed-Elsevier, Springer, Taylor & Francis, Wiley-Blackwell and the American Chemical Society. Libraries must pay a fortune for their bundled journals, while those outside the university system are asked to pay \$20, \$30, sometimes \$50 to read a single article.

While open access journals have grown rapidly, researchers still have to read the paywalled articles in commercial journals. And, because their work is assessed by those who might fund, reward or promote them according to the impact factor of the journals in which they publish, many feel they have no choice but to surrender their research to these companies as well. Science ministers come and go without saying a word about this scam.

After my cancer diagnosis earlier this year, I was offered a choice of treatments. I wanted to make an informed decision. This meant reading scientific papers. Had I not used the stolen material provided by Sci-hub, it would have cost me thousands. Because, like most people, I didn’t have this money, I would have given up before I was properly informed. I have never met Alexandra Elbakyan, and I can only speculate about alternative outcomes, had the research I read not swayed my decision. But it is possible that she has saved my life.

Like people in many countries where scholarship is poorly funded, Elbakyan discovered that she could not complete her neuroscience research without pirated articles. Outraged by the journals’ padlock on knowledge, she used her hacking skills to share papers more widely. Sci-hub allows free access to 70 million papers, otherwise locked behind paywalls.

She was sued in 2015 by Elsevier, which won \$15 million in damages, and in 2017 by the American Chemical Society, resulting in a \$4.8 million judgement. These were civil cases, concerning civil matters. While the US courts have characterised her activities as copyright violation and data theft, to me her work involves the restoration to the public realm of property that belongs to us and for which we have already paid. In the great majority of cases, the research carried in these journals has been funded by taxpayers. Most of the work involved in writing the papers, reviewing and editing them is carried out at public expense, by people working at universities. Yet this public asset has been

captured, packaged, and sold back to us for phenomenal fees. Those who must pay most are publicly-funded libraries. Taxpayers must shell out twice: first for the research, then to see the results. There might be legal justifications for this practice. There are no ethical justifications.

In any case, wherever Alexandra Elbakyan is (she lives in hiding), she is beyond the jurisdiction of the US courts. She moves Sci-hub between domains as it gets taken down. The numerous attempts to intimidate her have failed. One woman, with a small amount of crowdfunding, has smashed the wall erected by a \$19 billion industry.

Of course, she is by no means the only person to have challenged the big publishers. The Public Library of Science, founded by researchers who objected not only to the industry's denial of public access but also its slow, antiquated and clumsy modes of publishing that hold back scientific research, has demonstrated that you don't need pay walls to produce excellent journals. Advocates like Stevan Harnad, Bjorn Brembs, Peter Suber and Michael Eisen have changed the public mood. The brilliant online innovator Aaron Swartz sought to release 5 million scientific articles into the public domain. Facing the possibility of decades in a US federal prison for this selfless act, he killed himself.

Among Alexandra Elbakyan's achievements is to empower libraries to confront the big publishers. Now they can refuse to renew contracts with the companies that had them over a barrel, as their users have another means of getting past the paywall. As the system has begun to creak, government funding agencies have at last summoned the courage to do what they should have done decades ago, and demand the democratisation of knowledge.

Last week, a consortium of European funders, including major research agencies in the UK, France, the Netherlands and Italy, published their "Plan S". It insists that from 2020 research we have already paid for through our taxes will no longer be locked up. Any researcher receiving money from these funders must publish her or his work only in open access journals.

The publishers have gone ballistic. Springer Nature argues that this plan "potentially undermines the whole research publishing system." Yes, that's the point. The publishers of the Science series, who appear to live in a Trumpian world in which reality is inverted and syntax is mangled, maintain that it would "disrupt scholarly communications, be a disservice to researchers, and impinge academic freedom". Elsevier says "If you think information shouldn't cost anything, go to Wikipedia", inadvertently reminding us of what happened to the commercial encyclopedias.

Plan S is not perfect, and the death of the knowledge monopolists has been predicted before. But this should be the beginning of the end of Maxwell's outrageous legacy. In the meantime, as a matter of principle, do not pay a penny to read an academic article. The ethical choice is to read the stolen material published by Sci-hub.

How many Wikipedia references are available to read? We measured the proportion of open access sources across languages and topics.

How many Wikipedia references are available to read? We measured the proportion of open access sources across languages and topics.

By Miriam Redi, Dario Taraborelli and Jake Orlowitz•20 August 2018

Share

A lock and chain hold a gate shut.

Let's say you're planning a trip to a subtropical region and you want to learn about available vaccines for yellow fever. You look up the English Wikipedia article. You're lucky to find a well-sourced section, with a wealth of references, many of them pointing to information from public health agencies and reputable news articles. Great!

But then you decide to learn more about the scientific research on the treatment of yellow fever. You try to follow three citations, each a review article in a scholarly journal, and find that they're all behind a paywall and inaccessible to you.

As it turns out, you're not alone. When following a link to the official version of a scholarly article, Wikipedia readers are twice as likely to hit a paywall than one they can freely read.

Percentage of open citations

Citations are the bridge between Wikipedia articles and a broader landscape of reliable, secondary sources. Citations not only allow readers to verify the reliability of the facts they find in Wikipedia; through citations readers can also deep-dive into any given topic by exploring the books, scholarly publications, and news stories referenced in an article.

Wikipedia's use of open access sources—publications that can be accessed for free by anyone online[1]—plays a critical role in supporting fact-checking and in fostering digital literacy. Initiatives such as the Wikipedia Library's partnerships allow editors to gain free access to the paywalled literature, while automated tools such as OAbot help editors find openly accessible versions that can be added to Wikipedia article references. However, Wikipedia does not have policies that explicitly favor open access over subscription-based sources when citing information. In reality, Wikipedia still links both many paywalled and open access sources. How does this affect readers?

We recently released a dataset of all citations with identifiers in Wikipedia. This does not represent every single book, article, and website referenced on Wikipedia (more analysis of that to come), but the substantial subset of sources that have a code that uniquely identifies the work, such as a Digital Object Identifier (DOI) in the case of academic articles, or an International Standard Book Number (ISBN) for books. You might think of this large subset of citations as roughly representing the scholarly sources of Wikipedia. To estimate the proportion of these scholarly sources that are free to read, we are releasing a new dataset that sheds light on these citations by their accessibility level and topic.

To create this dataset, we cross-referenced our existing data with data provided by Unpaywall, a database gathering accessibility information of more than 19 million articles, and we associated each scholarly publication's digital object identifier (DOI) cited in Wikipedia with an accessibility label: "Open" if the publisher (source) provides a free copy, "Closed" if it is a paywalled publication, or "Available" if the official version is paywalled but there exists an open copy available elsewhere on the web (e.g., legally deposited by the author in a university repository). In total, we gathered accessibility values for around 450,000 scholarly publications cited across 300 Wikipedia languages.[2]

We find that less than half of the official versions of scholarly publications cited with an identifier in Wikipedia are freely available on the web: 29% are free-to-read at the source, while an additional 10% have a free-to-read version available elsewhere.[3]

Topic accessibility

The fraction of free-to-read content very much depends on the subject you're interested in. To explore the extent to which readers can access content without hitting a paywall depending on their interests, we characterized each publication with a topic category by looking at the main topic of the Wikipedia pages that cite a publication. We then used the drafttopic tool to assign a Wikipedia page with a topic from the Wikiproject Hierarchy. Since the tool works for English Wikipedia only, we assign topics to pages from non-English Wikipedias by finding their corresponding English Wikipedia version

through Wikidata.[4]

To explore this data at a glance, we published a number of visualizations through a Python notebook.

Wikipedia topics VS accessibility

Accessibility of publications cited in Wikipedia by article topic.

If you are passionate about space, you will have far more chances to freely access the sources of the Wikipedia articles you read: around 55% of publications in space-related articles are open. On the contrary, if you are interested in chemistry, you will very likely have to pay to read the publications cited in your favorite Wikipedia articles or rely on an institutional subscription: 83% of publications in chemistry articles across languages are paywalled.

Accessibility also varies significantly across languages. If you read Wikipedia in Belarusian, you will be linked to a wide number of free to read scholarly publications (around 45% are open). Conversely, if you only speak Khmer, only around 20% of the scholarly publications cited in your Wikipedia language edition can be freely accessed.

Wikipedia languages VS accessibility

Distribution of scholarly articles cited in each Wikipedia language edition by percentage of open access publications cited (left) and percentage of freely available paywalled publications cited (right). See our notebook visualizations for more comprehensive and interactive plots.

Beyond differences across topics and languages, our data also allows discovering areas of Wikipedia content that can be 'un-paywalled', i.e. topics for which we can improve the openness of referenced publications. For example, while articles in mathematics might not have a large amount of officially freely available sources (only 15%), we found that a larger proportion of publications in this field (25%) have a free copy available on the web. Similarly, Wikipedia in Punjabi is a language edition citing many paywalled sources (only 17% are open); however, around 24% of scholarly articles referenced in this language do have a non-paywalled version.

Exploring the data

Earlier this year, a team of developers from the Wikimedia Foundation, eLife and SAGE Publishing used the dataset to prototype a web-based tool called WikiCiteVis to search and visualize the world of Wikipedia citations. During the 2018 eLife Innovation Sprint, the team started working on the tool, and they have since produced a working web app that allows users to query the updated Wikipedia citation database in a browser, including links to Wikipedia articles and underlying cited articles. You can now see how a scholarly article or book is cited in Wikipedia using WikiCiteVis. Users are also welcome to provide feedback and suggest new features via GitHub, or to consider building these features themselves—find out more on eLife Labs.

You can access the full dataset of citations by topic and accessibility at <https://doi.org/10.6084/m9.figshare.6819710>. For our earlier data release and analysis

of the most cited sources in Wikipedia, check out this blog post or read more in Wired and Nature.

We are also conducting research to understand how Wikipedia readers use citations (and why) and to identify when individual statements need additional citations. Stay tuned for further updates on these projects.

We would also like to thank David Moulton, Senior Front-End Developer at eLife, his collaborators Sean Wiseman and Chris Wilkinson, along with Sam Walton from the Wikimedia Foundation and Ian Mulvany from SAGE, for working on WikiCiteVis during and after the eLife Innovation Sprint.

Footnotes

1. For the purpose of this analysis, we use the definition of “open” provided by Unpaywall, which refers to the accessibility of a scholarly article, not whether the article is published under free licenses that allow reuse. Studying the prevalence of free-licensed (or libre) open access citations is a challenge due to the lack of comprehensive data.
2. This analysis is limited to citations by DOI to assess the accessibility of a paper’s version of record. Citations templates often include additional links to accessible versions, when available.
3. In context, the practical accessibility of all citations on Wikipedia may be significantly higher. This dataset only contains citations with an identifier, which are much more common in scholarly journals (that are more likely to be paywalled). Many news websites or other types of source do not have an identifier (and are not in this dataset) but are free to access online.
4. Although this methodology gives us interesting insights on topic-accessibility, its main limitation is that we can assign a topic to a Wikipedia page only if it exists in English Wikipedia.

We owe you an explanation.

December 26: Fewer readers in the United States. Here's why:

You deserve an explanation, so please don't skip this 1-minute read. It's Friday, December 26 and while more people than ever rely on answers from Wikipedia, search tools make it less visible. With fewer readers this December, time is running out to hit our goal. We hope Wikipedia has given you at least \$2.75 of knowledge this year. If everyone who finds Wikipedia useful gave \$2.75, we'd hit our goal in a few hours.

It's been 25 years and Wikipedia is still free. It's still created by people, not machines, and we don't run ads or put up paywalls because we're not here to make a profit off

your attention. In other words, it's still the internet we were promised.

Less than 2% of our readers donate, so if you have given in the past and Wikipedia still provides you with \$2.75 worth of knowledge, donate today. If you are undecided, remember any contribution helps.

Digital object identifier

Full name Digital Object Identifier

Acronym DOI

Organisation International DOI Foundation

Introduced October 1997; 28 years ago[1]

A digital object identifier (DOI) is a persistent identifier or handle used to uniquely identify various objects, standardized by the International Organization for Standardization (ISO).[2] DOIs are an implementation of the Handle System;[3][4] they also fit within the URI system (Uniform Resource Identifier). They are widely used to identify academic, professional, and government information, such as journal articles, research reports, data sets, and official publications.

A DOI aims to resolve to its target, the information object to which the DOI refers. This is achieved by binding the DOI to metadata about the object, such as a URL where the object is located. Thus, by being actionable and interoperable, a DOI differs from ISBNs or ISRCs which are identifiers only. The DOI system uses the indecs Content Model to represent metadata.

The DOI for a document remains fixed over the lifetime of the document, whereas its location and other metadata may change. Referring to an online document by its DOI should provide a more stable link than directly using its URL. But if its URL changes, the

publisher must update the metadata for the DOI to maintain the link to the URL.[5][6][7] It is the publisher's responsibility to update the DOI database. If they fail to do so, the DOI resolves to a dead link, leaving the DOI useless.[8]

The developer and administrator of the DOI system is the International DOI Foundation (IDF), which introduced it in 2000.[9] Organizations that meet the contractual obligations of the DOI system and are willing to pay to become a member of the system can assign DOIs.[10] The DOI system is implemented through a federation of registration agencies coordinated by the IDF.[11] The cumulative number of DOIs has increased exponentially over time, from 50 million registrations in 2011 to 391 million in 2025.[12] The rate of registering organizations ("members") has also increased over time from 4,000 in 2011 to 9,500 in 2013, but the federated nature of the system means it is not immediately clear how many members there are in total today.[13] Fake registries have even appeared.[14]

Nomenclature and syntax

A DOI is a type of Handle System handle, which takes the form of a character string divided into two parts, a prefix and a suffix, separated by a slash.

prefix/suffix

The prefix identifies the registrant of the identifier and the suffix is chosen by the registrant and identifies the specific object associated with that DOI. Most legal Unicode characters are allowed in these strings, which are interpreted in a case-insensitive manner. The prefix usually takes the form 10.NNNN, where NNNN is a number greater than or equal to 1000, whose limit depends only on the total number of registrants.[15][16] The prefix may be further subdivided with periods, like 10.NNNN.N.[17]

For example, in the DOI name 10.1000/182, the prefix is 10.1000 and the suffix is 182. The "10" part of the prefix distinguishes the handle as part of the DOI namespace, as opposed to some other Handle System namespace,[A] and the characters 1000 in the prefix identify the registrant; in this case the registrant is the International DOI Foundation itself. 182 is the suffix, or item ID, identifying a single object (in this case, the latest version of the DOI Handbook).

DOI names can identify creative works (such as texts, images, audio or video items, and software) in both electronic and physical forms, performances, and abstract works[18] such as licenses, parties to a transaction, etc.

The names can refer to objects at varying levels of detail: thus DOI names can identify a journal, an individual issue of a journal, an individual article in the journal, or a single table in that article. The choice of level of detail is left to the assigner, but in the DOI system it must be declared as part of the metadata that is associated with a DOI name, using a data dictionary based on the indecs Content Model.

Display

The official DOI Handbook explicitly states that DOIs should be displayed on screens and in print in the format doi:10.1000/182.[19]

Contrary to the DOI Handbook, Crossref, a major DOI registration agency, recommends displaying a URL (for example, <https://doi.org/10.1000/182>) instead of the officially specified format.[20][21] The DOI Foundation guarantees these URLs to be persistent[22] i.e. such URLs are PURLs — providing the location of a name resolver which will redirect HTTP requests to the correct online location of the linked item.[10][23]

The Crossref recommendation is primarily based on the assumption that the DOI is being displayed without being hyperlinked to its appropriate URL—the argument being that without the hyperlink it is not as easy to copy-and-paste the full URL to actually bring up the page for the DOI, thus the entire URL should be displayed, allowing people viewing the page containing the DOI to copy-and-paste the URL, by hand, into a new window/tab in their browser in order to go to the appropriate page for the document the DOI represents.[24]

Content

Major content of the DOI system currently includes:

Scholarly materials (journal articles, books, ebooks, etc.) through Crossref, a consortium of around 3,000 publishers; Airiti, a leading provider of Chinese and Taiwanese electronic academic journals; and the Japan Link Center (JaLC)[25] an organization providing link management and DOI assignment for electronic academic journals in Japanese.

Research datasets through DataCite, a consortium of leading research libraries, technical information providers, and scientific data centers;

European Union official publications through the EU publications office;

The Chinese National Knowledge Infrastructure project at Tsinghua University and the Institute of Scientific and Technical Information of China (ISTIC), two initiatives sponsored by the Chinese government.

Permanent global identifiers for both commercial and non-commercial audio/visual content titles, edits, and manifestations through the Entertainment ID Registry, commonly known as EIDR.

In the Organisation for Economic Co-operation and Development's publication service OECD iLibrary, each table or graph in an OECD publication is shown with a DOI name that leads to an Excel file of data underlying the tables and graphs. Further development of such services is planned.[26]

Other registries include Crossref and the multilingual European DOI Registration Agency (mEDRA).[27] Since 2015, RFCs can be referenced as doi:10.17487/rfc....[28]

Features and benefits

The IDF designed the DOI system to provide persistent identification. Each DOI name permanently and clearly identifies the object it belongs to (although when the publisher

of a journal changes, sometimes all the DOIs will be changed, with the old DOIs no longer working). It also associates metadata with objects, allowing it to provide users with relevant pieces of information about the objects and their relationships. Included as part of this metadata are network actions that allow DOI names to be resolved to web locations where the objects they describe can be found. To achieve its goals, the DOI system combines the Handle System and the indecs Content Model with a social infrastructure.

The Handle System ensures that the DOI name for an object is not based on any changeable attributes of the object such as its physical location or ownership, that the attributes of the object are encoded in its metadata rather than in its DOI name, and that no two objects are assigned the same DOI name. Because DOI names are short character strings, they are human-readable, may be copied and pasted as text, and fit into the URI specification. The DOI name-resolution mechanism acts behind the scenes, so that users communicate with it in the same way as with any other web service; it is built on open architectures, incorporates trust mechanisms, and is engineered to operate reliably and flexibly so that it can be adapted to changing demands and new applications of the DOI system.[29] DOI name-resolution may be used with OpenURL to select the most appropriate among multiple locations for a given object, according to the location of the user making the request.[30] However, despite this ability, the DOI system has drawn criticism from librarians for directing users to non-free copies of documents, that would have been available for no additional fee from alternative locations.[31]

The indecs Content Model as used within the DOI system associates metadata with objects. A small kernel of common metadata is shared by all DOI names and can be optionally extended with other relevant data, which may be public or restricted. Registrants may update the metadata for their DOI names at any time, such as when publication information changes or when an object moves to a different URL.

The International DOI Foundation (IDF) oversees the integration of these technologies and operation of the system through a technical and social infrastructure. The social infrastructure of a federation of independent registration agencies offering DOI services was modelled on existing successful federated deployments of identifiers such as GS1 and ISBN.

Comparison with other identifier schemes

A DOI name differs from commonly used Internet pointers to material, such as the Uniform Resource Locator (URL), in that it identifies an object itself as a first-class entity, rather than the specific place where the object is located at a certain time. It implements the Uniform Resource Identifier (Uniform Resource Name) concept and adds to it a data model and social infrastructure.[32]

A DOI name also differs from standard identifier registries such as the ISBN, ISRC, etc. The purpose of an identifier registry is to manage a given collection of identifiers, whereas the primary purpose of the DOI system is to make a collection of identifiers

actionable and interoperable, where that collection can include identifiers from many other controlled collections.[33]

The DOI system offers persistent, semantically interoperable resolution to related current data and is best suited to material that will be used in services outside the direct control of the issuing assigner (e.g., public citation or managing content of value). It uses a managed registry (providing both social and technical infrastructure). It does not assume any specific business model for the provision of identifiers or services and enables other existing services to link to it in defined ways. Several approaches for making identifiers persistent have been proposed.

The comparison of persistent identifier approaches is difficult because they are not all doing the same thing. Imprecisely referring to a set of schemes as "identifiers" does not mean that they can be compared easily. Other "identifier systems" may be enabling technologies with low barriers to entry, providing an easy to use labeling mechanism that allows anyone to set up a new instance (examples include Persistent Uniform Resource Locator (PURL), URLs, Globally Unique Identifiers (GUIDs), etc.), but may lack some of the functionality of a registry-controlled scheme and will usually lack accompanying metadata in a controlled scheme.

The DOI system does not have this approach and should not be compared directly to such identifier schemes. Various applications using such enabling technologies with added features have been devised that meet some of the features offered by the DOI system for specific sectors (e.g., ARK).

A DOI name does not depend on the object's location and, in this way, is similar to a Uniform Resource Name (URN) or PURL but differs from an ordinary URL. URLs are often used as substitute identifiers for documents on the Internet although the same document at two different locations has two URLs. By contrast, persistent identifiers such as DOI names identify objects as first class entities: two instances of the same object would have the same DOI name. In May, 2024, an Internet Draft was introduced to register the "doi" scheme,.[34] Many experts were not aware of this draft,[35] and the latest draft has currently expired.

Resolution

To resolve a DOI name, it may be input to a DOI resolver, such as one at the official website <https://doi.org/>.

DOI name resolution is provided through the Handle System, which is an infrastructure developed and operated by CNRI (Corporation for National Research Initiatives), and is freely available to any user encountering a DOI name. Resolution redirects the user from a DOI name to one or more pieces of typed data: URLs representing instances of the object, services such as e-mail, or one or more items of metadata. To the Handle System, a DOI name is a handle, and so has a set of values assigned to it and may be thought of as a record that consists of a group of fields. Each handle value must have a data type specified in its <type> field, which defines the syntax and semantics of its

data. While a DOI persistently and uniquely identifies the object to which it is assigned, DOI resolution may not be persistent, due to technical and administrative issues.

Another approach, which avoids typing or copying and pasting into a resolver is to include the DOI in a document as a URL which uses the resolver as an HTTP proxy, such as <https://doi.org/> (preferred)[36] or <http://dx.doi.org/>, both of which support HTTPS. For example, the DOI 10.1000/182 can be included in a reference or hyperlink as <https://doi.org/10.1000/182>. This approach allows users to click on the DOI as a normal hyperlink. Indeed, as previously mentioned, this is how Crossref recommends that DOIs always be represented (preferring HTTPS over HTTP), so that if they are cut-and-pasted into other documents, emails, etc., they will be actionable.

An interesting consequence of the fact that DOIs depend entirely on CNRI's Handle System infrastructure (whereby CNRI operates the global root servers and wrote the protocol) is that the proxy services [doi.org/<#>](https://doi.org/) and hdl.handle.net/<#> are interoperable. For example, the following URLs resolve to the same publication:
[https://doi.org/10.1016/S0021-9258\(19\)52451-6](https://doi.org/10.1016/S0021-9258(19)52451-6)
[https://hdl.handle.net/10.1016/S0021-9258\(19\)52451-6](https://hdl.handle.net/10.1016/S0021-9258(19)52451-6)

There are other DOI resolvers and HTTP Proxies apart from NCRI's Handle System. At the beginning of the year 2016, a new class of alternative DOI resolvers was started by <http://doai.io/> (now discontinued [37]). This service was unusual in that it tried to find a non-paywalled (often author archived) version of a title and redirected the user to that instead of the publisher's version.[38] Since then, other open-access favoring DOI resolvers have been created, notably <https://oadoi.org/> in October 2016[39] (rebranded in 2017 as <https://unpaywall.org/>). While traditional DOI resolvers solely rely on the Handle System, alternative DOI resolvers first consult multiple Open Access resources such as institutional libraries with the Open Archives Initiative Protocol for Metadata Harvesting (OAI-PMH), or indexing services based in OAI-PMH, such as BASE (Bielefeld Academic Search Engine).[37][39]

An alternative to HTTP proxies is to use one of a number of add-ons and plug-ins for browsers, thereby avoiding the conversion of the DOIs to URLs,[40] which depend on domain names and may be subject to change, while still allowing the DOI to be treated as a normal hyperlink. A disadvantage of this approach for publishers is that, at least at present, most users will be encountering the DOIs in a browser, mail reader, or other software which does not have one of these plug-ins installed.

IDF organizational structure
International DOI Foundation

Logo of the foundation

Company type 501(c)(6) organization

Founded October 10, 1997; 28 years ago

The International DOI Foundation (IDF), a non-profit organization created in 1997, is the governance body of the DOI system.[41] It safeguards all intellectual property rights

relating to the DOI system, manages common operational features, and supports the development and promotion of the DOI system. The IDF ensures that any improvements made to the DOI system (including creation, maintenance, registration, resolution and policymaking of DOI names) are available to any DOI registrant. It also prevents third parties from imposing additional licensing requirements beyond those of the IDF on users of the DOI system.

The IDF is controlled by a Board elected by the members of the Foundation, with an appointed Managing Agent who is responsible for co-ordinating and planning its activities. Membership is open to all organizations with an interest in electronic publishing and related enabling technologies. The IDF holds annual open meetings on the topics of DOI and related issues.

Registration agencies, appointed by the IDF, provide services to DOI registrants: they allocate DOI prefixes, register DOI names, and provide the necessary infrastructure to allow registrants to declare and maintain metadata and state data. Registration agencies are also expected to actively promote the widespread adoption of the DOI system, to cooperate with the IDF in the development of the DOI system as a whole, and to provide services on behalf of their specific user community. A list of current RAs is maintained by the International DOI Foundation. The IDF is recognized as one of the federated registrars for the Handle System by the DONA Foundation (of which the IDF is a board member), and is responsible for assigning Handle System prefixes under the top-level 10 prefix.[42]

Registration agencies generally charge a fee to assign a new DOI name; parts of these fees are used to support the IDF. The DOI system overall, through the IDF, operates on a not-for-profit cost recovery basis.

Standardization

The DOI system is an international standard developed by the International Organization for Standardization in its technical committee on identification and description, TC46/SC9.[43] The Draft International Standard ISO/DIS 26324, Information and documentation – Digital Object Identifier System met the ISO requirements for approval. The relevant ISO Working Group later submitted an edited version to ISO for distribution as an FDIS (Final Draft International Standard) ballot,[44] which was approved by 100% of those voting in a ballot closing on 15 November 2010.[45] The final standard was published on 23 April 2012.[2]

DOI is a registered URI under the info URI scheme specified by IETF RFC 4452.[46] info:doi/ is the infoURI Namespace of Digital Object Identifiers.[47]

The DOI syntax is a NISO standard, first standardized in 2000, ANSI/NISO Z39.84-2005 Syntax for the Digital Object Identifier.[48]

The maintainers of the DOI system have registered a DOI namespace for URNs.[49]

Text & Data Mining

LIBER believes that libraries and their users should be empowered to contribute to an innovative and competitive Europe.

That is why we are actively advocating for a more flexible copyright system that will allow text and data mining to be used to its full potential.

What is text and data mining?

“Text and data mining (TDM) is the process of deriving information from machine-read material. It works by copying large quantities of material, extracting the data, and recombining it to identify patterns.” – UK Government

There are four stages to the TDM process. First, potentially relevant documents are identified. These documents are then turned into a machine-readable format so that structured data can be extracted. The useful information is extracted (Stage 3) and then mined (Stage 4) to discover new knowledge, test hypotheses, and identify new relationships.

Image credit: JISC / Value and Benefits of Text Mining (2012)

Image credit: JISC / Value and Benefits of Text Mining (2012)

Why Is It Important?

TDM will increase the progress of science exponentially. It has the potential to facilitate the discovery of cures for diseases such as cancer and Parkinson’s. It has already been used to discover how existing drugs can be used to treat other conditions. It will also act as a foundation for innovation and new industry.

For libraries, who provide access to a growing amount of scientific content, it means that the researchers we support will be able to fully realise the value of the content we

hold. This will, in turn, ensure a more rigorous approach to research, including more through reviews of the literature.

How is LIBER helping?

We are collaborating with a number of influential organisations and individuals to ensure that the European Union hears our call for legislative change that will better enable text and data mining.

We clearly expressed our views in our response to the EU's 2014 copyright review. We have participated in and then withdrew from the Licenses for Europe process when it became clear that there were serious concerns about the scope, composition and transparency of the process.

Our withdrawal was preceded by a letter of concern sent to the European Commission, to express the need for a more flexible copyright system. This letter was supported by over 60 influential organisations and individuals, representing researchers, science organisations and industry (read the EC's response).

In London, we organised a workshop The Perfect Swell to highlight the future potential and challenges related to TDM. We also produced a Factsheet on TDM, to make it easier for our members to understand and explain the importance of text and data mining to their professional and user communities.

Looking for a rare book/pdf
From my father, who is a scholar of the occult but not very savvy when it comes to torrents, etc. Can you guys help us?

I've been searching for the first two volumes of Hoodoo - Conjuraton - Witchcraft - Rootwork by Harry Middleton Hyatt, printed by Western Publishing for the Memoirs of the Alma Egan Hyatt Foundation and distributed by the American University Bookstore back in 1970. Someone is selling scans on youtube for \$500 each:
<https://www.youtube.com/watch?v=Lw84O3Mxlug>. These must be out there somewhere in some torrent on the dark web - can you find them for me? I thought maybe the occult digimob would have them, but they look like they've gone belly up.

I don't know where you are, but I found this on Lucky Mojo:

"The bulk of the Hyatt collection is currently archived at the UCLA Center for the Comparative Study of Folklore and Mythology and in the Quincy [Illinois] University Department of Special Collections. "

So the UCLA Center for the Comparative Study of Folklore and Mythology has a link to a page where you can request to view their holdings if you know when you're going to be there.

Quincy University in Illinois has a whole frickin' Hyatt Folklore Collection. You can't look at the whole thing, but you can get permission to view some of it if you write ahead. Their webpage has contact info, but it's got to contain a copy of his best known books.

Family vacation?

Edit: Or go here and put in your zip code and it will tell you what nearby libraries have it. They catalog libraries worldwide.

I know that if a book is over 100 years old, it becomes open source.

That being said, Google has this thing called "The Guttenberg project", in which they scan all those open source books and you can view them for free. I would give that a try.

And if you know other languages, look for it in those languages.

Good luck, yo!

"Hoodoo - Conjuraton -
Witchcraft - Rootwork"
by
HARRY MIDDLETON HYATT

Harry Middleton Hyatt was an Anglican minister who collected folklore as a hobby. Raised in Quincy, Illinois, Hyatt received his M.A. and D.D. at Kenyon College and Oxford University. He served as assistant rector at the Church of the Holy Spirit in New York City from 1951 to 1965. After his retirement in 1965, he returned to his home-town of Quincy, Illinois.

As a folklorist, Hyatt began this work in his own home-town, and then proceeded onward to collect magical spells throughout the South. His two major works in this field were "Folklore From Adams County Illinois" (1935) and "Hoodoo - Conjuraton - Witchcraft - Rootwork" (1970). In addition, Hyatt was also a genealogist who published two books on his own family, "The Millers of Millersburg Kentucky" (1929) and "Descendents of John Walton of Baltimore Co. Maryland and Harrison Co. Kentucky" (1950).

The bulk of the Hyatt collection is currently archived at the UCLA Center for the Comparative Study of Folklore and Mythology and in the Quincy [Illinois] University Department of Special Collections.

"FOLKLORE FROM ADAMS COUNTY ILLINOIS"

"Folklore From Adams County Illinois" (FACI) contains hundreds of simple spells, folk-magical beliefs, herb-based medical remedies, riddling rhymes, and folkloric tales. It consists of 10,949 entries on 723 pages, including an index. It was self-published by Hyatt in two editions, the first in 1935, and the second in 1965. Both editions were released under the imprint "Memoirs of the Alma C. Hyatt Foundation." Alma C. Hyatt was his wife. The second edition contains a lengthy illustrated appreciation of the then-late Alma Hyatt, in which Mr. Hyatt explains to the world what an inspiration she was to him.

The section of "Folklore From Adams County Illinois" that deals with witchcraft is the most useful part of the book. It is comprised of brief quotes from unnamed local folks to whom Hyatt assigned cultural ascriptions (e.g. "Irish," "German," "Negro," etc.) so that one can place the speakers in the traditions from which they come. Unfortunately, as Hyatt explains in his preface, the material was edited and "omission of Negro dialect means that colored folk speak the same language as their white neighbors" with the exception of "a small vocabulary peculiar to themselves [of which] examples occur frequently in the text." Even more inexplicably, all "lore definitely Jewish was excluded [and] the same is true of three or four Indian [Native American] sayings." Furthermore, Greeks and Italians living in the area, according to Hyatt, "are newcomers, and have not been approached for folk-lore." Such egregious editorial deletions blemish what would otherwise be a balanced representation of folk-magical practices in Illinois at that time, but if one keeps these exclusions in mind, "Folklore From Adams County Illinois" is still a valuable document. The lengthy section on African-American hoodoo spells, and the unique quality of these spells, is what led Hyatt to undertake his later, more massive, work of hoodoo folk-magic collection in the South.

I am often asked what the differences are between the 1935 and 1965 editions of "Folklore from Adams County Illinois" (FACI). Basically -- they are different, period. The 1935 edition is easier to read (it is a typeset octavo volume), but the 1965 edition is MASSIVE -- presented in typewriter type, like the later "Hoodoo - Conjuraton - Witchcraft - Rootwork" books, and matching them in size and binding. Additionally, the 1965 FACI is the only place where you can learn more about Hyatt himself -- for it contains a section printed on glossy paper in which he describes his life and his relationship with his wife Alma, who was his muse and financial supporter throughout his long years of dedicated folklore collecting.

The other question often asked is "Why do i need to read FACI when it is not about hoodoo?"

False premise!

A great deal of FACI is in fact about hoodoo.

FACI represents the largest attempt ever to catalogue ALL the beliefs of ALL the people living in one region (Adams County Illinois, like the title says). There are oversights -- Hyatt refused to collect material from Jews or Native Americans, for reasons that defy rationality at this point -- but there were plenty of black people in Adams County, and Hyatt collected all of their hoodoo beliefs, spells, and practices in FACI, and labelled them "Negro" for ease of extraction by researchers.

It was Hyatt's realization that Negro magical beliefs differed greatly from his own English American culture's beliefs that led him to go South and work on "Hoodoo - Conjuraton - Witchcraft - Rootwork", the largest collection of folklore from one cultural group in America.

But FACI is not only important because it served as Hyatt's introduction to hoodoo -- it is also the most thorough and factual record of Irish, English, German, and other white European magical beliefs in America ever assembled, and, as such, it deserves a place on the shelf of any American Neo-Pagan, Wiccan, Fam-Trad or Pow Wow Magic practitioner.

"HOODOO - CONJURATION - WITCHCRAFT - ROOTWORK"

"Hoodoo - Conjuration - Witchcraft - Rootwork" (HCWR) is a 5-volume, 4766-page collection of folkloric material gathered by Hyatt in Alabama, Arkansas, Florida, Georgia, Illinois, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia between 1936 and 1940. Supplementary interviews were conducted in Florida in 1970.

The "Hoodoo" collection consists of 13,458 separate magic spells and folkloric beliefs, plus lengthy interviews with professional root doctors, conjures, and hoodoos. All but one of Hyatt's 1600 informants were African-Americans, but several narrations by European-Americans (collected for his earlier book, "Folklore From Adams County, Illinois") were also included. Hyatt recorded the material on Edison cylinders and a device called a Telediphone, often without the full knowledge of the participants. He then transcribed and annotated it for publication. Occasionally his equipment failed or was not available and he took hand-written notes instead. The 1930s field recordings have since been destroyed, with the exception of a few cylinders that Hyatt had pressed onto 78 rpm records. The Florida interviews of 1970, recorded on cassette tapes, have survived.

As if to overcome the ham-fisted linguistic editing of Negro dialect that marred "Folklore From Adams County Illinois," this time Hyatt transcribed the speech of his informants semi-phonetically. What may look to modern eyes like "racial stereotyping" or making fun of Southerners was actually his sincere attempt to catalogue variant regional pronunciations. If you read several spells, you will see that he did NOT impose upon his informants one single stereotyped "black dialect" or "Southern dialect" but in fact conveyed, as accurately as he could, the true sound of each person's speech. Reading the spells aloud and noting the location where each informant lived will help you comprehend this. I do not intend to apologize for Hyatt's technique, and i hope that future scholars will not do so either.

The publication of this material was accomplished between 1970 and 1978, again under the imprint "Memoirs of the Alma C. Hyatt Foundation." The first two volumes were issued as a set in 1970, and said to be complete, but then, after a few years, three more volumes were released. Hyatt died before the sixth volume, an index, was prepared.

The contents of "Hoodoo - Conjuration - Witchcraft - Rootwork" are about as follows (numbers in parentheses are page number):

Volume One:

introduction (i - xliii)

general description of beliefs (1-19)

belief in spirits, ghosts, the Devil, and the like (19 -164)

how rootworkers operate; testimony from laymen (165 - 217)

comparisons between medical doctors and root doctors (217 - 269)

typical methods used by root doctors (269 - 349)

timing of spells and recurrence of the effects of spells over time (349 - 361)

folk medicine: principles of healing (361 - 410)

folk medicine: alphabetical list of ingredients (410 - 519)

mojo hands grouped somewhat alphabetically according to their major ingredient (e.g. buckeye nuts, needles, black cat bone, salt, sulphur) (519 - 669)

spells for business luck grouped somewhat alphabetically according to their major ingredient (669 - 744)

shrines: altars (primarily New Orleans) (744 - 797)

shrines: candles (primarily New Orleans) (797 - 862)

shrines: saints (primarily New Orleans) (862 - 888)

more layman testimonies (888 - 931)

Volume Two:

map of fieldwork (932)

lengthy interviews with professional root doctors (933 - 1843)

documentary material, correspondence, etc. (1843 - 1844)

Volume Three:

more interviews with root doctors (1844 - 2339)

conjure work utilising human body parts and waste

sexual fluids, sex magic, and impotence (2341 - 2509)

blood ("everyday blood" and "her private time") (2509 - 2540)

urine (2540 - 2618)

excrement (2618 - 2636)

sweat (2636 - 2781)

Volume Four:

more conjure work utilising human body parts and waste

sweat, clothes, shoes, and foot tracks

hair

finger nails, toenails, and foot skin

systemic body ailments:

"live things in you"

cures for disease

alcoholism

to keep persons asleep

a few more interviews with root doctors

murder: how a murderer can escape

murder: how a murderer can be caught
death, burial, and graveyard dirt
body substitutes: photographs
body substitutes: names and hand-written letters
court cases (theft?)
more about candles (continued from Volume One)
hens' eggs
salt and its combinations
red pepper and its combinations (excluding salt)
various notes and interviews
Volume Five:

more salt (continued from Volume Four)
more nails, needles, pins, and tacks (continued from Volume One)
more frogs and toads (continued from Volume One)
more black cat bone material (continued from Volume One);
one more interview with a root doctor
the Florida fieldwork of 1970, grouped alphabetically by major ingredient
"odds and ends" (mostly procedural)
Volume Six:

the index, was in preparation when Hyatt died and it was never released, leading to the frustrating condition of the material as it now stands. However, as i use extracts from Hyatt's material in my own work, i create html cross-links between pages. This will, in effect, help generate an indexed database. In addition, i have placed online an index to the names and residential locations of Hyatt's informants, for the convenience of people interested in the broader areas of African-American genealogy and material culture during the 1930s.

MY DEBT TO HARRY M. HYATT

Like almost everyone who has followed in Hyatt's shoes, i owe him a debt for his dedication and perseverance in collecting so much magical lore and making it available to all. Although i began my own research into hoodoo in the early 1960s, before the reprint of FACI or the first volumes of HCWR were published, i found Hyatt's work invaluable from the time i first read it. I have made some use of his material to bolster my own presentations, and, for those who are interested, here is a list of Hoodoo in Theory and Practice web pages that contain quoted passages from Harry Hyatt's research:

Aunt Caroline Dye of Newport, Arkansas
Bluestone and Mexican Blue Anil Balls
Body Fluids: Menstrual Blood, Urine, Semen
Crossroads Rituals
Devil's Shoestring
Foot Track Magic

Goofer Dust
Hoodoo History and Definition of Terms
Hoyt's Cologne
Hyatt's African-American informants
Madam Myrtle Collins of Memphis, Tennessee
Nation Sack
Protection Spells
Salt
Secrets of the Psalms
Silver Dimes

As you run across Hyatt material at this site, please note:

- 1) All the transcribed spells quoted in Hoodoo in Theory and Practice are from the 1936-1940 "Hoodoo" sessions unless otherwise noted.
- 2) The number at the beginning, if any, is Hyatt's spell number. (Interviews were not numbered.)
- 3) Code numbers at the end of a spell are Hyatt's identification of the informants and the number of the recording cylinder itself.
- 4) Any words in (parentheses) in the text were spoken aloud by Hyatt during the interviews and any words in [brackets] were his written commentary to the publication. MY OWN further comments, if any, appear in {italics in curly brackets}, and most of them consist of additional information or corrections to Hyatt's characteristic transcription errors (e.g. his invariable mis-transcription of Hoyt's Cologne as "Hearts Cologne" or "herts perfume").
- 5) I have occasionally broken some of the book's run-on paragraphs into shorter chunks, for easier reading.

Whats your opinion on the Seth Material written by Jane Roberts ?

I've been reading the Seth Material off and on for the last 1-2 years, and find it quite spiritually empowering. What do you guys think about it ? Would really love to hear people's personal experiences with the teachings contained in it ! :) Or if you have any other opinions.

I've read all of the Seth books over the years, starting in the 70s. I believe they answer all of my questions about life/lives and what we are doing here.

I've only read Seth Speaks: The Eternal Validity of the Soul, but I really enjoyed it.

I think 'spiritually empowering' is a great way to describe my own thoughts on the material. Whether Jane was a nut or actually channeling an entity, who knows.

I've been meaning to acquire the other books and read them as well, I just haven't got around to it.

Yeah, thats a bit how I tend to perceive it as well. I think we can only judge from what she wrote , and what she wrote is immensely powerful stuff (in my opinion) .

I know I am a little late here, but this is the only Seth related thread I could find on Reddit.

I am a 28 year old PhD student in biomedical engineering; a scientific minded person, but have always been fascinated by dreams and consciousness (things that scientists seems to avoid or are not ready to address). My Dad introduced me to the Seth Material a while ago and it was definitely something that resonated with my interests. I just started getting back into it and will give my opinion.

The Material is so well spoken. One really gets the feel that "something" who understands reality at a deeper level is trying to explain it to us with good intentions.

It creates some connections between science and spirituality, which is something I believe is important in better understanding of reality.

There are plenty of compelling examples and thought experiments provided that help associate the concepts presented with modern daily life.

It seems to complex to be a hoax, yet it is too unorthodox to gain traction in society which is unfortunate.

One negative is that sometimes I feel it is difficult for the information to have an impact

in my daily life. It definitely changes the way I think about things, but I still find myself making decisions that don't take the information into account. Perhaps meditation is the only way to truly grasp the concept first hand, as I find myself trying to use logic to connect the pieces, like I'm reading a text book.

Another issue I have is I haven't encountered a more clear example of how you create your own reality, which is an important foundation of The Material. It is difficult to tell if Seth implies that our beliefs, emotions, and desires dictate where we find ourselves in life; or if we literally create the matter we observe. This also makes me think of quantum physics where particles exist as probabilities until they are observed and "materialized". I don't know! This is still unclear to me.

Anyways, some other authors (or teachers) I have found interesting are Ken Wilber, Jiddu Krishnamurti, Ervin Laszlo, and Deepak Chopra.

Glad to see others are interested in Seth. Keep reading! Keep thinking! What are you??

93 - My opinion reflects that of Crowley's from 1910 or so: "Since truth is supra-rational, it is incommunicable in the language of reason. Hence all mystics have written nonsense, and what sense they have written is so far untrue. Yet as a still lake yields a truer reflection of the sun than a torrent, he whose mind is best balanced will, if he become a mystic, become the best mystic."

Most people who "channel" are not active meditators or familiar with (let alone versed in) occult techniques, so they are not "still lakes" in that sense, and what they say may or may not be cool at parts but is generally too clusterfuck-y to be of any real, lasting worth.

I do not think he himself would have passed his own muster. In the end we all fall victim to our own biases and prejudices.

93 - Crowley was, at certain times of clarity, very aware of his own biases and tended toward self-criticism/skepticism and openness. Other times, not so much.

A boomer friend of mine used to live down the street from her and said she was a nice woman. Then one day my friend walked out and the house down the street was surrounded with cars. The Seth material had started to make the rounds. She said her neighbor remained nice but became ever weirder after that. My friend thought it was fascinating, since she's a social worker and counselor, but her verdict was that her neighbor had lost her mind. A pretty normal response, I think. The takeaway is that she never seemed like a con man to my friend, just a nut.

She says right in the introduction to The Nature of Personal Reality (could have the title wrong, it's been a long time) that she felt that 'seth' was an extension of her own creativity. Which I think was a fancy way of saying she understood she was making shit up as she went along, at least on some level.

I think you can waste a lot of time with that stuff, and if you look at what's it's wrought, it aint pretty, ie: The Secret, Eckhart Tolle, 'the law of attraction', and all the extended New Age commerce, etc...

It's exciting that Seth is being discussed on Reddit, regardless of intent. My intent is quite different than yours; I feel your interpretation is too limited. In the introduction to TNOPR, Jane writes: "Actually, I think that the selves we know in normal life are only the three dimensional actualizations of other source-selves from which we receive our energy and life. Their reality can't be contained in the framework of our creaturehood, though it is being constantly translated through our present individuality."

Haven't read the Seth books specifically, I have read the Conversations With God books by Neale Donald Walsch which I imagine is probably pretty similar though, so I can just give broad overarching opinions.

Personally I think the majority of people who claim to be channellers (Jane Roberts, Neale Donald Walsch, etc) are either delusional or intentionally being fraudulent, leaning toward just delusional. I.e. they are not actually in contact with any entity. The majority of the things written in such states are just philosophical ideas like anyone would expect upon deep meditation, the same new-age crap people bring back from drug trips.

Of course most people here doing scrying, automatic writing, etc are doing the same things, so it really comes down to your opinion on whether these techniques actually put you in contact with sentient entities or only work through internal psychology.

My opinion...

If you are in contact with an omnipotent being, prove it with very detailed and accurate predictions about the future, or verifiable proof that could not be messed with in advance.

If you are in contact with non-omnipotent beings (ie. extraterrestrial), prove it by working with them to produce advanced technologies

If the entity can manifest things into your life that aren't verifiable... do it for yourself,

teach others about it if you want, but don't waste your time trying to prove it

If the entity cannot provide any useful information (ie. the spirit of a dead human) - what is the point of it / what could you possibly gain aside from entertainment?

The 'Conversation with God' material is nothing like the Seth material IMO (I've read some of both). The Seth material I found to be profound and deeply interesting. I personally couldn't say the same thing with Neale Donald Walsch's material (though that kind of judgement is highly subjective)..

Edit: some context - I encountered the Seth Material, specifically 'The Nature of Personal Reality' and 'Seth Speaks' early on in my journey into consciousness and it's borderlands. I found it to be detailed, rich and illuminating of subjects and histories I had no idea nor opinion of at the time, with an emphasis on the creative and magical qualities of mind and becoming, as much as being. The 'Conversation with God' texts I encountered some decades later, after having woven through varying kinds of practices and experiences. It didn't seem so striking nor as detailed, perhaps more basic in its presentation of similar content. I couldn't get any further than the second book. Concepts I learned of through Seth/Jane Roberts still influence my world view and understanding today..

Thanks for sharing your opinion ! I think Jane might fall into the 3rd category a bit, her claims might not have been verifiable in the scientific physicalist sense, but she did practice and teach it to others without getting into trying to prove it too much (as far as I know).

BoTL has much data encoded into it as proof of dictation, If an entity/current/force chooses to use you as an avatar of expression there will generally be a verification beforehand.

Anyway the Seth material is not bad but it's just recycled mysteries

I'm 10 years late to this discussion, but here is my opinion on the Seth material: I have been a big fan and believer myself in new age, spirituality and the law of attraction. I believed that we created our own reality, through our thoughts and emotions. When I came by the Seth material, I started listening to the audiobook, and I was instantly hooked. I agreed on most things Seth said and I found it interesting how Seth explained

that he had lived many lives on Earth, and now lived in another dimension, which does not require a body. I find it also very interesting how Seth tries to explain the beginning of the universe and God/Jesus.

Now later I understand the truth of the bible and how God himself came to Earth as Jesus Christ to save humanity from sin (hell) and showed us our true nature, which is kindness and compassion. We are created in God's image, and there is a plan for all of us. These teachings does not align with Seth's teachings, which is that you create your own reality and your thoughts manifest into reality. If God did not exist, it leads you to think that you need to make your own plan and do everything by yourself. Which is not true, because God did not create you without knowing his plan for you. I also wonder how Seth knows so much, from the beginning of the universe and so on. God is all knowing, and only God can know these things, otherwise he can give you access to information, but it is weird that Seth speaks on the existence of God without being all powerful and all knowing. Another thing here is that Seth speaks on Jesus Christ as being chosen by God randomly, and he was choosing Jesus because he was available at the time for him to be used as a messenger. This is a lie. Jesus Christ is God himself. He was chosen before he was born.

Also the name Set (greek Seth) was a God of the deserts, storms, disorder, violence and and foreigners in ancient Egyptian religion. (Wikipedia)

The name chosen as Seth is interesting when you see the underlying meaning of the name.

I also want to say that most of the teachings seems to be very positive and uplifting. But that does not mean it is true. If Seth is speaking about the beginning of things, who God is, that Jesus Christ was randomly picked, and that the way of life is through your own ownership. This is not the way to salvation, that is actually telling you lies that sounds wonderful. The lies is always in the details. And we all know who the father of lies is? It is Satan himself. The truth will set you free.

Great -- now reverse the Seth material with the bible/Christianity. You could easily say the same thing about those beliefs, because they are just that -- beliefs. Your reasoning is all referential to a Christian framework, assuming it to be correct and "good." Seth never claims to be God, but the Christian God does. Does that mean we just accept and take it at face value? If so, why? Because it has been around longer? The "lies" you proclaim again assume the teachings of the bible to be true without question. On what authority? It's own authority?

I'm not trying to convince you that seth is right and the bible is wrong. But I think it is

most important to understand for yourself what goodness is at its core before going to an outside source for information. Otherwise, you're doing it in reverse and trying to take away a core message that you don't have a foundation built for in yourself.

Well, magical thinking in government leads to oppression. I like my spirituality, but i wouldn't want to live in a world governed by witches. Secular rationalism is the only way to go.

Sorry, was that a rhetorical question?

Hey, I really appreciate you removing the racist books, but I have to ask where you found this stash, since I'd like to check the deleted books as well, or are they just not occult related in any way, in that case, nevermind. Also thanks for sharing, this looks interesting.

P.S.: "The Little White Book" on that drive looks like something you should delete.

Here's an article that talks about it some.

TL;DR White supremacists are looking for religions that justify their feelings of hatred/violence. Christianity is seen as a Jewish construct/very passive religion, while Odinism is seen as rewarding action in life.

some of the scientists that worked on it died because of high radiation coming of it, some sort of anti-gravity tech. I don't know how it worked it just sounds interesting that it had rune carved in it, I want to know what they meant! also i think Himmler was the real occultist in the nazis Hitler sounded like a stage hypnotist.

Madame Blavatsky, Aleister Crowley and their work/teachings would 100% be called racist, xenophobic, far right, 'culture appropriating' white supremacist mansplaining fascists by today's 'liberals' and leftists. Just cause (for example) Nazi's did an (occult) study and came to a conclusion, doesn't mean the conclusion is faulty or the study is bad. I'm a bit bummed out that nearly this entire thread is so simple minded.

EDIT: I mean seriously, where do you think the occult third reich got their Aryan supremacist ideas from?

-1

[deleted]

•

7y ago

People can downvote that, but I don't really see anyone actually disputing it. With all this talk of how we need to just ignore anything messed up that people like Crowley did or said and only focus on the work that is useful, it does seem like most people will just pick and choose when that applies.

I get the feeling that none of you actually care about these "moral battles" at all. You can pretend to care, just like a bunch of kids tearing down a statue of some dead guy that liked slavery, all while recording the event on devices made by modern slaves. It's all about pretending to be a good person as long as it means never having to give up anything you care about.

The complete A.R.K. - drive (Occult Library) by Mark Passio available for download!

I regret to inform you that I've made the decision to stop seeding the ARK torrent. I cannot in good conscience with God share content that promotes such objectively false bunk as "Christ Conspiracy" and particularly "Zeitgeist" that contains claims NOT in accordance with TRUTH that have been debunked for over 10 years now. God of the bible is the one true God and everything one needs to know in order to get to know God and start fighting the spiritual warfare against one's flesh and the deincarnate "rulers of

this world" can be found in the bible. I respect Mark Passio immensely but he has been blinded by the god of this world regarding the true nature of these deincarnate beings and their chief master, Satan (who deceiveth the whole world). Time is short, I urge everyone to get to know Jesus personally and to be filled with the Holy Spirit of God. You don't need to believe it, you can experience it for yourselves. We are living in end times and Jesus is coming back soon. The Mark of the Beast (the microchip) will be forced upon people soon as many of you know.

ELI5: C.G. Jung "The Red Book" and his Liber series?

The biggest things I want to know is:

How and where did he start his "journey"

What was his end goal?

I am super broke and can't put out for all the books (especially because the last time I checked, the red book was expensive), so does anyone know if there are good (english) PDF's or audio books out there for free?

His journey started when his life began to fall apart in his early 30s. He had been hiding his mystical/occultist leanings, which were a HUGE part of his childhood (he came from a family full of supernatural, mystical, and psychotic influences), from his professional and academic peers as much as he could, but would discuss his ideas with his mentor and close friend Sigmund Freud. Freud and Jung disagreed about some important psychoanalytic theories, which, after 10 years of friendship, led to a violent end of the relationship, throwing Jung into a deep depression. Around the same time, Jung's marriage was falling apart, partly due to his open affair with a patient/student. He was also increasingly terrified at the prospect of WWI. This personal crisis is what catalyzed his descent into his unconscious. He decided to withdraw from teaching, quit his job at the mental hospital, and kept only a few patients, spending the next 2-3 years basically isolated and experimenting with his consciousness to trigger visions and hold conversations with the spirits he evoked, especially his main guardian and teacher, Philemon. Most of the Red Book was produced during this intensive period.

I don't think he had a specific one, and that they changed over time, depending on personal context and whatever new system of thought he was into. Some important goals: Discovering his personal mythology. Integrating the conscious and unconscious. Achieving self-realization. Being a channel for the birth of a new religion, for which he may or may not have been the messiah.

Already addressed.

This is more of the answer I was looking for :D. Also how did he start with his methods? Did he just kind of do trail and error stuff until he started having visions?

He had a natural, inherited inclination toward mystical/supernatural experience. Jung's maternal grandfather was a pastor and possible schizophrenic who "trained" his young daughter (Jung's mother) to ward off evil spirits while he worked on his sermons. As a child, Jung witnessed his mother in conversation with spirits in her room as he hid behind the door. This contrasted with the beliefs of his father, who was also a pastor and had Jung's mother sent to an asylum for long periods at a time. From an early age, Jung had an extremely active dream life, was a strong introvert who spent his free time communing with nature in the woods near his house, and developed many peculiar rituals to protect himself from negative influences. In school he realized he had the power to create and overcome his own neurosis, but he became convinced that he had two personalities: one, a regular Swiss child who followed the boring rules of society, and two, a mysterious 17th century nobleman who was wise and respected scholar with mystical powers (possibly influenced by the legacy of Jung's paternal grandfather, a famous Swiss physician, 33rd degree Freemason, and possible illegitimate child of Goethe). In college, Jung organized seances with his mother and cousin, who seemed a talented medium, to contact the spirit world, and learned how to put himself in a controlled trance and evoke hallucinations.

So you could say Jung was predestined to become who he was. I wrote a bio on Jung in college and obviously it was incredibly fascinating. It's also interesting to see how he changed after college:

Jung at one point realized that his cousin had been faking her medium experiences, after he caught her repeating some stories he had given her to read while she was supposedly channeling a spirit. He became disillusioned and wrote his master's thesis "On the psychology and pathology of so-called occult phenomena", in which he basically labelled his cousin as mentally ill and managed to hide all the details of his own involvement. Soon after this he got a job at a world-renowned mental hospital (Burgholzli), working under the "discoverer" of schizophrenia, Eugene Bleuler, and focused purely on mainstream psychiatry for years, in which he became a famous researcher in his own right. Only after meeting Freud later on did he become interested in psychoanalysis, which eventually led him to study the mythological content of schizophrenic hallucinations. This contributed to his theory of the collective unconscious ("how else could schizophrenics show similar thematology all over the world?") and, I think, gradually reawakened his interest in the occult. I think that tension between

keeping up appearances as a mainstream psychiatrist but wanting to explore the deeper truths of mankind was a huge stressor on his psyche, so that when the dams finally burst, he did a complete 180 and got lost in his own mind for a good while. During his "confrontation with the unconscious" he refined his technique of "active imagination", which combined the trance techniques he already knew with the free association methods he had developed as a psychiatrist.

A great read for understanding Jung's life and the development of his thought processes is his quasi-autobiography, *Memories, Dreams, and Reflections*.

3) check your local library

See if your local library has an online catalog, and if you can reserve the book. I did this, and received notification that it was available for pick-up, went in and was shocked at how large it was. It's a beautiful book. By all means grab the torrent or a PDF version, but check out the real thing if you can, even if it's for 30 days -- it's fantastic. Good luck!

ELI5 CG Jung...

I found that a bit funny. Seriously though, if you haven't read it (given 1 and 2 I'm guessing not) I'd recommend reading 'Memories, Dreams, Reflections' first. It's a fairly short, casual read (most of his other publications are a lot more involving) wherein he describes much of his overall motivations (including those for Liber Novus) and methodology. I think it may also be available online. It's not where I started, but in retrospect IMO one of the best places for someone interested in Jung to start.

If you (or anyone else considering it) do want to get the Red Book, you may want a digital version. The actual book is so enormous as to be unwieldy - just reading it at home can be awkward, forget taking it anywhere. It's beautiful, but gigantic (worth the price IMO but also rather expensive). This is assuming that a digital has both the original and English translation and not just the translation (even if you don't know German I'd say it's worth having both).

I think even if you know German it would be pretty damn hard to read all that dense calligraphy!

At the point of questioning.

What do you do after you're enlightened? Now what? I think the non goal was his intent, that the point is simply change. And it's not better or worse, just different.

Favorite online occult resources

This has all probably been posted before but if not please feel free to add to the list so we can share!

[Sacred Texts] (<http://www.sacred-texts.com/>) : "the largest freely available archive of online books about religion, mythology, folklore and the esoteric on the Internet. The site is dedicated to religious tolerance and scholarship, and has the largest readership of any similar site on the web."

[Digimob] (<http://digimob.forumotion.net/>) A decent forum for all things occult AND if one were inclined to download their torrent links one would have a whole library worth of information.

[Hermetic.com] (<http://hermetic.com/>) Some interesting hermetic and other resources for the occult mind.

[Thelemapedia] (http://thelemapedia.org/index.php/Main_Page) "...open-source encyclopedia of Thelema and Magick, including topics on Qabalah, astrology, yoga, godforms, biographies, and the works of Aleister Crowley."

[Twilit Grotto: Archives of Western Esoterica] (<http://www.esotericarchives.com/>): A good mix of occult authors and topics

[Occult Underground] (<http://www.occult-underground.com/>) A LOT of ads but a lot of books for download as well.

Works of Darkness

Hey guys, I need a pdf of this title by E.A Koetting (or any of his other works). His books are far too pricey. I want to try before I buy. Would anyone be willing to give me the link?

Ok so a quick search shows that this guy has a "Buy my ebook!" site. I never trust those.

After a quick skim, it's really nothing out of the ordinary as far as common LHP writings go. It's a bit "Lulz, look how evels I is!" but no worse than a lot of other writings. Seems to be a lot of rehashed material, similar to Michael Ford's stuff or the Demonic Bible. If you're new to the LHP, it could be an ok introductory text I guess.

Definitely torrent rather than buy, maybe there'll be something of value in there.

Voici une collection OCCULTE ÉNORME de 465 Go. Magie, GD, Thélème, Tarot, Kabbale, Vidéos, Audios, PDF, etc... Tout. Ça marche pour moi sur uTorrent. C'est lent, mais ça marche. Je télécharge les 465 Go entiers. Prévoyez au moins 2-3 jours. D'abord, vous téléchargez le fichier Torrent. Ensuite, vous ajoutez le fichier Torrent

localement et manuellement. En ce moment, il y a au moins 14 pairs et 11 semeurs.

Copier et coller :

Le problème avec beaucoup de ces téléchargements massifs de textes, c'est qu'ils sont remplis d'œuvres d'auteurs que beaucoup d'entre nous connaissent personnellement. Aucun auteur occulte ne gagne sa vie avec ses œuvres. Ils devraient au moins pouvoir être récompensés pour l'effort qu'il leur a fallu pour faire des recherches et écrire un livre. L'autre problème, c'est qu'il y a tellement de merde mélangée.

Je crois que le mien fait ~80 Go ; il y a tellement de trucs à trier là-dedans que ça prendrait des années et ça me qualifierait probablement pour un putain de doctorat en bibliothéconomie.

Celui-là, par contre... c'est autre chose. Il y a des centaines de cassettes de méditation guidée là-dedans. Oh là là. Je pense sérieusement à acheter un autre disque dur.

Édition, parce que je pense que c'est important de le noter : j'ai acheté des copies physiques de nombreux livres que j'ai trouvés utiles après les avoir lus en format électronique, parce que je veux soutenir le travail des auteurs.

1

janus418

•

6y ago

Je me souviens être tombé sur une bibliothèque torrent similaire (Library v1.5) de cette envergure il y a des années, mais soyons honnêtes, est-ce que tu as vraiment besoin de télécharger une énorme bibliothèque si tu vas juste avoir besoin ou parcourir juste quelques textes ?

Oh et bonne chance pour trier toute la merde dans le tas ; ce n'est pas vraiment aussi bien organisé qu'il le prétend.

Je trouve que d'avoir des copies physiques de livres me forcerait à vraiment lire mes livres. Va soutenir les auteurs, mon pote.

3

tgparker2010

OP

•

6y ago

Il y a beaucoup d'auteurs de merde qui écrivent des livres de merde. Il y a de très bons auteurs et malheureusement beaucoup d'auteurs qui sont pires qu'inutiles. J'ai plus de 200 vrais livres occultes "EN VERSION PAPIER" dans ma bibliothèque. J'aime bien les consulter AVANT d'acheter.

Tu parles de ce Torrent ? Ça a l'air super intéressant. Merci pour le tuyau. Library v1.5 (Fixed).torrent

https://www.mediafire.com/file/wv3gwdybuddgffz/Library_v1.5_%2528Fixed%2529.torrent

nt/file

Au fait, j'ai plus de 200 livres imprimés en dur dans ma bibliothèque occulte. Je soutiens fidèlement mes auteurs préférés. J'aime bien feuilleter mes livres avant de les acheter. Il y a tellement de merde et seule une petite partie de ce qui existe est bonne. J'aime bien regarder avant de sauter !

Je partage juste quelque chose d'utile que j'ai trouvé en traînant sur internet. J'ai aussi vu beaucoup de versions différentes de cette bibliothèque.

1

pmi

•

6y ago

Sans tenir compte des problèmes de droits d'auteur d'un tel torrent. Quel est l'intérêt ? Tu vas lire quelque chose de tout ça ? Tu vas trouver un système à suivre pour travailler et maîtriser ?

Maintenant, les copies numériques de livres sont utiles (tu peux voyager plus facilement avec et c'est plus facile de citer si elles sont bien OCRisées). Mais une archive de 465 Go, c'est un peu comme aller dans une librairie d'occasion et acheter absolument tout, juste pour le fun.

Mais au final, je suppose que si ça te convient, c'est parfait :)

6

tgpark2010

OP

•

J'ai plus de 200 livres physiques "HARD COPY" réels sur l'Occulte dans ma bibliothèque. J'aime bien les consulter AVANT d'acheter. Il y a beaucoup de bouquins inutiles et pourris. Il y a de très bons auteurs et malheureusement beaucoup d'auteurs qui sont pires qu'inutiles.

La plupart des applications Torrent te permettent de sélectionner les dossiers et les fichiers que tu veux télécharger AVANT, comme ça tu perds pas de temps, de bande passante et d'espace disque sur des trucs que tu veux pas ou dont t'as pas besoin.

1

pmi

•

6y ago

C'est tout à fait vrai. J'ai bien plus de 200 livres en version papier. Et parfois, oui, tu finis par faire des achats inutiles. Mais je suppose que c'est à ça que servent les critiques de blogs, Goodreads, les critiques Amazon et les recommandations d'amis. Et parfois, il faut juste se lancer.

Mais au final, je suppose que c'est ce qui marche pour toi :)

The complete A.R.K. - drive (Occult Library) by Mark Passio available for download!
I regret to inform you that I've made the decision to stop seeding the ARK torrent. I cannot in good conscience with God share content that promotes such objectively false bunk as "Christ Conspiracy" and particularly "Zeitgeist" that contains claims NOT in accordance with TRUTH that have been debunked for over 10 years now. God of the bible is the one true God and everything one needs to know in order to get to know God and start fighting the spiritual warfare against one's flesh and the deincarnate "rulers of this world" can be found in the bible. I respect Mark Passio immensely but he has been blinded by the god of this world regarding the true nature of these deincarnate beings and their chief master, Satan (who deceiveth the whole world). Time is short, I urge everyone to get to know Jesus personally and to be filled with the Holy Spirit of God. You don't need to believe it, you can experience it for yourselves. We are living in end times and Jesus is coming back soon. The Mark of the Beast (the microchip) will be forced upon people soon as many of you know.

A small warning. PDF files can contain harmful code

I've ran VirusTotal detection engine against 1/3rd of the files

No threats found.

I've ran ESET Endpoint against ALL files

No threats detected as well

Yet I would still recommend not using Windows PDF reader nor Adobe. Both allow pdf files to establish communication with the outside world to a certain extend and/or run code on local machine

Recommend using Sumatra PDF or Foxit PDF

Both pdf readers can't do sh*t, without user input.

For the super paranoid, running it within a VM environment without ethernet connection would be the best course of action.

Man when i found foxit reader it changed so much for me compared to adobe. Much better tool for reading files and making notes. Started using it here on my master.

I have a medium quality laptop made in 2011 (more or less) and with Adobe there was no way I could scroll smoothly in a big document.

I love foxit reader because it allows me to read pdfs like a normal person. And its auto scroll feature is awesome.

The structure of reality and it's laws, such as the law of vibration and how to use the vibrations of the mind to influence the vibrations of reality. The structures of energies that influence our life and how to utilize them. How to navigate other planes of existence. How the microcosm reflects the macrocosm. How to do inner work in order to complete self-actualization.

If you are interested I recommend the Kybalion it's about 40 pages and free online, written a hundred years ago anonymously.

Edit: also a lot of eastern esoteric books talk about achieving enlightenment and having a higher state of consciousness

The moon shouldn't be here. Period. All our sciences, religions and faiths fail to mention this little truth bomb. Everything from Newtonian theory of gravity to the Big Bang theory is part of a smoke-screen to keep us from seeing it for what it is.

The fabric of reality is threaded so fine, that even when presented with observable facts, people refuse to accept them as truth. We prefer exotic, exoteric explanations to simple, honest ones. We believe random luck is a creative force. We seem to thrive on mystery and unanswerable questions. The smarter and/or more educated we are, the less likely we are to accept cause-and-effect scenarios that we can observe with our own eyes.

Hollywood knows what's up with the moon. Remember how the Matrix ended? In the 'real world' they flew above the clouds and up into space, then they turned around and fell back down to Earth. They needed to 'see the moon' before they could be really effective. Tomorrowland's heroes followed the same template. Armageddon's, too.

There. You asked for it. Now go be a hero

I'm looking for some ANCIENT books.

Hello,

I'm looking for PDF or hard copies of the books below (PREFERABLY FREE):

Simon Necronomicon https://en.wikipedia.org/wiki/Simon_Necronomicon (YES, I KNOW THIS ISN'T ANCIENT - I'D LIKE TO READ IT ALL THE SAME)

The Prodigies Of Egypt

<https://www.amazon.com/Prodigies-Egypt-Murtada-ibn-al-Afif/dp/1515177955>

Akhbar Al Zaman (mentioned in The Prodigies of Egypt) The History of Time

The Book of the Son go Gnosis and the subtitles of elevated things.

https://en.wikipedia.org/wiki/Shams_al-Ma%27arif

If you were able to link me to them, i'd be eternally grateful. Also, feel free to let me know about your experiences or chat about any of these books.

NOTE*** I'M LOOKING TO READ THESE FOR EDUCATIONAL PURPOSES. I DON'T BELIEVE IN SUPERNATURAL INTERFERENCE, NOR WOULD I WISH TO IF I DID...

Check out the UK Publisher, 'Forgotten Books,' I stumbled upon them recently & is my first go-to for any searches of original texts and the inherent translations

<https://www.forgottenbooks.com/en>

If its not there....head to the Holy Grail of all ancient texts & closest thing we have to the Library of Alexandria itself IMO.....the Vatican Library's digital archive

this torrent library contains Simon Necronomicon

you are going to need a torrent downloading software, and definitely a VPN if you live in a country where torrent download of copy right violating content is illegal.

I'm looking for some ANCIENT books.

Hello,

I'm looking for PDF or hard copies of the books below (PREFERABLY FREE):

Simon Necronomicon https://en.wikipedia.org/wiki/Simon_Necronomicon (YES, I KNOW THIS ISN'T ANCIENT - I'D LIKE TO READ IT ALL THE SAME)

The Prodigies Of Egypt
<https://www.amazon.com/Prodigies-Egypt-Murtada-ibn-al-Afif/dp/1515177955>

Akhbar Al Zaman (mentioned in The Prodigies of Egypt) The History of Time

The Book of the Son go Gnosis and the subtitles of elevated things.
https://en.wikipedia.org/wiki/Shams_al-Ma%27arif

If you were able to link me to them, i'd be eternally grateful. Also, feel free to let me know about your experiences or chat about any of these books.

NOTE*** I'M LOOKING TO READ THESE FOR EDUCATIONAL PURPOSES. I DON'T BELIEVE IN SUPERNATURAL INTERFERENCE, NOR WOULD I WISH TO IF I DID...

Check out the UK Publisher, 'Forgotten Books,' I stumbled upon them recently & is my first go-to for any searches of original texts and the inherent translations

<https://www.forgottenbooks.com/en>

If its not there....head to the Holy Grail of all ancient texts & closest thing we have to the Library of Alexandria itself IMO.....the Vatican Library's digital archive

The Simon Necronomicon is a grimoire attributed to "Simon", allegedly a pseudonym of writer Peter Levenda. Materials presented in the book are a blend of ancient Middle Eastern elements, with allusions to the writings of H. P. Lovecraft and Aleister Crowley, woven together with a story about a man known as the "Mad Arab".

The book was released in 1977 by Schlangekraft, Inc. in a limited edition hardback printing, followed by a paperback release by Avon Books, and a subsequent paperback release by Bantam Books.

Simon's introduction

The introduction to the book (comprising about 80 pages of a total of 263) is the only part that Simon claims to have written. It relates how Simon and his associates were introduced to a Greek translation of the Necronomicon by a mysterious monk. Simon claims that after experimenting with the text, they verified that the work is a genuine collection of magical rituals that predates most known religions, and warns that anyone attempting to use the Necronomicon may "unleash dangerous forces". The introduction attempts to establish links between H. P. Lovecraft, Aleister Crowley and ancient mythology (including Sumerian, Babylonian, Assyrian, and Chaldean myths and rituals), and draw parallels to other religions (such as Christianity, Wicca, Satanism and Hebrew Mythology). Some of the discussion is based on a supposed connection between Crowley and Lovecraft first espoused by Kenneth Grant.

"The Testimony of the Mad Arab"

In addition to an introduction, the book uses a frame story titled "The Testimony of the Mad Arab". The "Testimony" is in two parts, forming a prologue and an epilogue to the core Necronomicon. The author describes himself as a "Mad Arab".

The prologue explains how the Arab first came to discover the dark secrets that he is recording, accidentally witnessing an arcane ritual performed by a cult that worships Tiamat, in which both the demons Kutulu and Humwawa are conjured.

In the epilogue, the Mad Arab is haunted by premonitions of his gruesome death. He realizes that the horrors of the Necronomicon are enraged and seek revenge upon him for revealing their existence to the world. The text is littered with non sequiturs and arcane incantations, presented as indication of his unstable mental state and his desire to protect himself from perceived danger. He is unable to sign his work, and thus remains nameless.

Magic

Much of the book is a collection of magic rituals and conjurations. Many incantations and seals are described. Most of these are intended to ward off evil or to invoke the Elder Gods to one's aid. Some of them are curses to be used against one's enemies. The incantations are written in a mixture of English and more ancient languages, with a few possible misspellings in the romanization of the archaic words. There are also several words that do not appear to be from any known language.

The many magical seals in the book pertain to particular gods and demons, and are used when invoking or summoning the entity with which each is associated. In some cases there are specific instructions on how to inscribe the seals and amulets, including the materials that should be used and the time of day for their creation; in other cases, only the seal itself is given.

For some rituals, the book mentions that sacrifices should be offered. One ritual in particular describes a human sacrifice of 11 men, needed to enchant a knife that can summon Tiamat (pp. 160–161).

Both the introduction and the book's marketing make sensational claims for the book's magical power. The back blurb claims it is "the most potent and potentially, the most dangerous Black Book known to the Western World," and that its rituals will bring "beings and monsters" into "physical appearance". The book's introduction gives readers frequent warnings that the powers it contains are potentially life-threatening, and that perfect mental health is needed; otherwise the book is extremely dangerous. It claims a curse afflicted those who helped publish the book. It also claims that the Golden Dawn methods of magical banishing will not work on the entities in this book.

Textual authenticity

According to one book on the topic, *The Necronomicon Files*, several portions of the *Necronomicon* bear striking similarities to other works mentioned in its bibliography, such as R. C. Thompson's *The Devils and Evil Spirits of Babylonia* and James B. Pritchard's *Ancient Near Eastern Texts Relating to the Old Testament* — to an extent that it appears unlikely that separate translations could have arrived at the same result.[1] In addition, two members of the Magickal Child scene, Khem Caigan (the *Necronomicon*'s illustrator) and Alan Cabal, an American occultist, have independently stated that the book was widely known as a hoax in the local occult community and references Peter Levenda as the author.[2]

Owen Davies calls *Simon Necronomicon* "a well-constructed hoax",[3] but adds that making a grimoire by stitching together material from previous sources is a well-worn motif in grimoire history, and that "it is their falsity that makes them genuine." The same thing is pointed out by Dan Clore who writes[4] that the hoax *Necronomicons* are every bit as "authentic" as the *Lesser Key of Solomon* or the *Sixth and Seventh Books of Moses*.

Accusations of black magic and connections to murder

The book was featured as courtroom evidence in the murder trial of Rod Ferrell, with suggestions that it played a part in Satanic human sacrifices. Ferrell, it is claimed, used the book during cult rituals.[5]

Dead Names

In 2006, Avon published Simon's *Dead Names: The Dark History of the Necronomicon* (ISBN 0-06-078704-X), in which he details the history of the *Necronomicon* and attacks

his critics who claim the book is a hoax. The book's conclusions are considered suspect by his critics.[6]

The Prodigies of Egypt Paperback – July 30, 2015

by Murtada ibn al-'Afif (Author), John Davies (Translator)

4.8 4.8 out of 5 stars (14)

Murtada ibn al-'Afif, also known as Murtadi, son of Gaphiphus (1154 or 1155-1237 CE), was an obscure Arabian writer who studied in Alexandria, Damascus, and Cairo. While he is credited with having written many books, no titles survive, not even the original title of his only complete work to survive to modern times, the book known variously as the Egyptian History or the Prodigies of Egypt, which reported traditional folklore associated with the pyramids, the Flood, and the wonders of Egypt. In French and English translations (the Arabic original was lost) the Prodigies of Egypt influenced the English Romantics, and it preserves some legends of Egypt not found in other sources. This edition reprints the 1672 translation of John Davies to bring this medieval treasury to modern readers in its classic and widely-cited English translation.

5.0 out of 5 stars Interesting Collection of text

Reviewed in Australia on December 24, 2019

Format: PaperbackVerified Purchase

We can never be sure what has been lost to history, and little pieces remain from the deep past that sometimes surprise us. This book is supposedly one of those pieces. It reads surprisingly well given that it is apparently an older english translation (from 1672) of a much older text (according to common accounts the text was originally translated into french from arabic). The complete original (written between 1155-1237 BCE) being lost to the tides of time. It contain many interesting stories of Ancient Egyptian folklore (some of which is supposedly Pre-Flood) that isn't commonly supported by the established historical community. It is contain some very interesting myths and much like other ancient texts one cannot be truly sure where myth ends and truth begins. It remains an interesting cultural artefact that is worth reading.

Shams al-Ma'arif (The Book of the Sun of Gnosis)

The introduction of the Book A manuscript copy, beginning of 17th century

AuthorAhmad al-Buni (traditional attribution, possibly pseudepigrapha)

Language Arabic

Genre Occult treatise, Grimoire

OCLC 20121408

LC Class BF1771 .B8 Arab

Shams al-Ma'arif or Shams al-Ma'arif wa Lata'if al-'Awarif[a] is a grimoire centered on Arabic magic. It is claimed to be a manual for achieving esoteric spirituality. The work is included within the larger compilation Shams al-ma'ārif al-kubrā, which is also known as the "Shams al-Ma'arif". Although widely attributed to the 13th century North African Sufi scholar Ahmad al-Buni, his authorship of the text is disputed and has been argued to be pseudepigraphic (falsely attributed).[1] The Shams al-ma'ārif al-kubrā is a compilation work of a number of different authors, including some authentic work from al-Buni.[1][2] While being popular, it also carries a notorious reputation for being suppressed and banned for much of Islamic history.[3]

History

The authorship of the Shams al-Ma'arif wa Lata'if al-'Awarif was historically attributed to the North African late 12th- early 13th century Sufi scholar Ahmad al-Buni who purportedly wrote it while living in Central Maghreb (modern-day Algeria); he died around 1225 CE (622 AH).[4] However, Buni's authorship of the work is disputed. It has been suggested that another text, also known as the Shams al-Ma'arif found in the National Library of Damascus represents an authentic work of al-Buni, but its is very different from the more famous text of the same name, focusing on cosmology rather than magic, and works undoubtedly authored by al-Buni do not focus on magic, with the exception of Laṭā'if al-ishārāt briefly mentioning esoteric properties of Arabic letters. Jean-Charles Coulon has argued that Shams al-Ma'arif wa Lata'if al-'Awarif cannot be an authentic work of al-Buni due to the presence of anachronisms within the text that are inconsistent with al-Buni's known authentic works, thus making it pseudepigrapha. Coulon argues that the work is part of a "corpus Buniam" of authors working in the tradition of al-Buni, some of which was falsely attributed to al-Buni himself. Al-Buni's reputation for esoteric magic was later further enhanced by the 15th century Ottoman scholar Abd al-Rahman ibn Muhammad al-Bistami, who extensively commented on Buni's works, with a particular focus of al-Bistami being instructions for creating magical amulets and talismans. This was later followed by the composition of the expansive compilation work Shams al-ma'ārif al-kubrā containing the Shams al-Ma'arif wa Lata'if al-'Awarif as well as other esoteric magic works including those by al-Bisṭāmī, alongside authentic texts by al-Buni himself, which circulated in elite circles of the Ottoman Empire.[1]

Scholars like Ibn Taymiyya have criticized the book and labeled the author, Al-Buni, as a deluded devil (Shaytan) worshipper;[5][6] However, it continues to persist, and is still being read in public and studied in the present day, despite its questionable reputation.[5][7] Some Sufi orders, such as the Naqshbandi-Haqqani order have occasionally recognised its potential spiritual value, provided that the reader understands it.[8]

After its first modern era printing in Beirut on 1985, the government of Saudi Arabia imposed a ban on the book.[9] Ibn Jibrin, a Saudi scholar member of the Council of

Senior Scholars and of the Permanent Committee for Scholarly Research and Ifta; has issued Fatwa which forbid certain books, including the Shams al-Ma'arif.[10][11]

In the 20th and 21st century AD, Shams al-Ma'arif grew in recognition and was adopted by the Order of Nine Angles, a global terrorist Satanist organization, as one of their influences.[12] Although a translation into English has not been undertaken, there have been numerous renditions of a few of the more popular rituals found within the main treatise, as well as those that lie in its accompanying text. Some of these rituals have had various degrees of notability, but one of recurring presence in many publications is that of the Birhatiya[13][14] (also known as The Ancient Oath or Red Sulphur[15]).

In 2022 a partial English translation by Amina Inloes was published by Revelore Press as "Shams al-Ma'arif: The Sun of Knowledge An Arabic Grimoire: A selected Translation"[16]

In 2023, another English translation of the Shams al Ma'arif was published by Johann Voldemont as "Shams al-Ma'arif: Talismans and Magic Squares" which focuses primarily on the talismans and magic squares contained within the text.[17] Outside of the Arab and Western world, several editions of the book have been published in the Urdu and Turkish languages.[18][19][20]

Content

An Algerian manuscript of the Shams al-Ma'arif from 1868, Khalili Collection of Islamic Art

In contemporary form, the book consists of two volumes, Shams Al-Ma'arif al-Kubra[b] and Shams Al-Ma'arif al-Sughra,[c] the former being the larger of the two.[21][22] The first few chapters introduce the reader to magic squares, and the combination of numbers and the alphabet that are believed to bring magical effect, which the author claims is the only way to communicate with Jinn, angels and spirits. The table of contents that was introduced in the later printed editions of the work contains a list of unnumbered chapters (faṣl), which stretch to 40. However, before the printing press and various other standardisations, there were three independent volumes that circulated, each one differing in length.[23]

Another title by the same author, namely Manba' Usul al-Hikmah "The Source of the Essentials of Wisdom", is considered its companion text.[citation needed]

The Temple of Solomon

This book delves into the fascinating history and significance of the Temple of Solomon, placing it within the broader context of ancient Semitic religions and cultures. The author explores the historical and cultural influences that shaped the Temple's construction, drawing parallels with architectural and religious practices in Phoenicia and Egypt.

The book challenges the notion of the Temple as a solely Jewish creation, highlighting the shared religious symbolism and architectural elements found throughout the ancient Near East. By examining the political and religious landscape of the time, the author sheds light on the Temple's role as a symbol of royal power and its evolution into a central place of worship for the Jewish people.

Through a meticulous analysis of biblical and historical sources, the author unravels the complexities of early Yahwism and its relationship to neighboring polytheistic religions. The book delves into the Temple's symbolism, exploring the significance of its design, decorations, and rituals.

Ultimately, this book offers a thought-provoking perspective on the Temple of Solomon, revealing its multifaceted nature as a product of cultural exchange, religious evolution, and political ambition. By understanding the historical and cultural context surrounding the Temple, readers gain a deeper appreciation for its enduring legacy and its impact on the development of Judaism.

[The Story Behind Forgotten Books](#)

In 2007, we began a project: to revive some of the most insightful, fascinating books that were simply inaccessible. Whether they were out-of-print, unavailable for purchase, or often not even searchable, we started the journey of transforming ink pages into digital ones. Now, powered by pioneering restoration technology, we've become an online home of 1,294,109 titles (and continuously growing) drawn from the collective works of human history. But our mission is bigger: to digitally restore every forgotten book.

Skip The Arduous Book Search

Using the file name from your broken link, I was able to find it by searching DuckDuckGo. (Actually led me to an old post in r/Occult)

Copy is same as yours.

So, I will still give you that blowie if you want. Just press your junk against your screen. I have my mouth on the screen. I think it will work.

The Henry S. Olcott Memorial Library is a unique library bringing together the religious, philosophical, and spiritual traditions of the East and West, emphasizing the Ancient Wisdom tradition—Theosophy.

Founded in 1926 and named after Colonel Henry Steel Olcott, one of the founders of the Theosophical Society, the library is located at the Society's national center in Wheaton, Illinois. The library's collection of about 25,000 books, periodicals, video, and audio recordings is one of the finest in the country. Some of the many subjects included are Theosophy, Eastern philosophy and religions, comparative religion, esoteric Christianity, mysticism, mythology, psychology, parapsychology, meditation, healing, death and dying, astrology, and yoga.

Membership and Borrowing Information

Borrowing

Membership in the Theosophical Society in America includes library borrowing privileges (in person or by mail); however, members must register for this benefit with the library.

Nonmembers may register for library privileges for an annual fee of \$100 (local borrower) or \$120 (mail borrower).

Borrowing privileges are limited to persons residing in the United States. Please see the drop-down below for the Member Registration.

The Mail-in Registration can be printed out, filled out, signed, and sent to the library by postal mail or fax. Instructions are included on the form.

Borrowing By Mail

- **Eligibility:** The Henry S. Olcott Memorial Library can lend materials only to persons residing within the United States.
- **Request Forms:** Requests to borrow materials by mail should be made in writing. A pre-printed order form is available upon request. Registered users of the library may place borrowing requests directly from the Online Library Catalog.
- **Due Date:** The due date on material borrowed by mail allows two additional weeks for travel time. Materials must be returned to reach the library by the due date specified.
- **Shipping:** Borrowed materials may be returned in the same packaging in which they were received, by using the return labels provided. All materials may be shipped through some trackable means or insured which includes tracking. Borrowers pay the return postage.

* To ensure the timely availability of material to all our patrons, late fees are assessed on all past-due materials.

** A processing fee of \$10 per title will be charged for any materials lost or damaged while in the patron's possession. Additionally, the patron is responsible for the item's replacement cost, plus applicable overdue fines.

My name's Julie and I've been running this site for around thirteen years. I format all the ebooks myself, as well as maintaining the website. This is an ongoing project that was born from a love of reading and a commitment to make ebooks that look good.

Notice

You may notice that some books on the site are no longer free. Over the past few months, donations have fallen sharply, and after much thought I've made the decision to charge a small fee for certain titles. This project has always been a labour of love, but the hours spent sourcing, reformatting, and preparing each ebook are considerable. Without some return, it simply became unrealistic to keep everything free.

I've run this site for 13 years, and I want it to continue - properly, sustainably, and with the same care it has always had. Unfortunately, there has also been a rise in people reselling my ebooks and even entire collections, which makes it even harder on a personal level to keep the project going as it was.

At the moment, only a few books have a modest fee, but over time (most likely months, it's slow going!) most titles will move to that model. I'll keep a selection of shorter works free, and seeing as right now, 98% of books are still free, donations remain very much appreciated (and needed!). I'll also continue adding new material. The recently introduced scanned-PDF section will grow as well; it allows me to share interesting

books that would be too complex or time-intensive to transcribe, and these will remain free.

Thank you to everyone who has supported the site over the years. Your encouragement has meant more than you know. I hope you understand the need for this change, and I'm grateful for your continued support as the project moves into its next chapter.

The FAQ has been updated to include the new direction, in case you wanted a bit more info.

Thinking, Fast and Slow

Daniel Kahneman

The Guru To The Gurus At Last Shares His Knowledge With The Rest Of Us. Nobel Laureate Daniel Kahneman's Seminal Studies In Behavioral Psychology, Behavioral Economics, And Happiness Studies Have Influenced Numerous Other Authors, Including Steven Pinker And Malcolm Gladwell. In Thinking, Fast And Slow, Kahneman At Last Offers His Own, First Book For The General Public. It Is A Lucid And Enlightening Summary Of His Life's Work. It Will Change The Way You Think About Thinking. Two Systems Drive The Way We Think And Make Choices, Kahneman Explains: System One Is Fast, Intuitive, And Emotional; System Two Is Slower, More Deliberative, And More Logical. Examining How Both Systems Function Within The Mind, Kahneman Exposes The Extraordinary Capabilities As Well As The Biases Of Fast Thinking And The Pervasive Influence Of Intuitive Impressions On Our Thoughts And Our Choices. Engaging The Reader In A Lively Conversation About How We Think, He Shows Where We Can Trust Our Intuitions And How We Can Tap Into The Benefits Of Slow Thinking, Contrasting The Two-system View Of The Mind With The Standard Model Of The Rational Economic Agent. Kahneman's Singularly Influential Work Has Transformed Cognitive Psychology And Launched The New Fields Of Behavioral Economics And Happiness Studies. In This Path-breaking Book, Kahneman Shows How The Mind Works, And Offers Practical And Enlightening Insights Into How Choices Are Made In Both Our Business And Personal Lives--and How We Can Guard...Read more...

Mindset : The New Psychology of Success
Carol Dweck, Carol S. Dweck

Mindset is one of those rare books that can help you make positive changes in your life and at the same time see the world in a new way. A leading expert in motivation and personality psychology, Carol Dweck has discovered in more than twenty years of research that our mindset is not a minor personality quirk: it creates our whole mental world. It explains how we become optimistic or pessimistic. It shapes our goals, our attitude toward work and relationships, and how we raise our kids, ultimately predicting whether or not we will fulfill our potential. Dweck has found that everyone has one of two basic mindsets. If you have the fixed mindset, you believe that your talents and abilities are set in stone—either you have them or you don't. You must prove yourself

over and over, trying to look smart and talented at all costs. This is the path of stagnation. If you have a growth mindset, however, you know that talents can be developed and that great abilities are built over time. This is the path of opportunity—and success. Dweck demonstrates that mindset unfolds in childhood and adulthood and drives every aspect of our lives, from work to sports, from relationships to parenting. She reveals how creative geniuses in all fields—music, literature, science, sports, business—apply the growth mindset to achieve results. Perhaps even more important, she shows us how we can change our mindset at any stage of life to achieve true success and fulfillment. She looks across a broad...Read more...

The Mountain Is You : Transforming Self-Sabotage Into Self-Mastery
Brianna Wiest

"This is a book about self-sabotage. Why we do it, when we do it, and how to stop doing it—for good. Coexisting but conflicting needs create self-sabotaging behaviors. This is why we resist efforts to change, often until they feel completely futile. But by extracting crucial insight from our most damaging habits, building emotional intelligence by better understanding our brains and bodies, releasing past experiences at a cellular level, and learning to act as our highest potential future selves, we can step out of our own way and into our potential. For centuries, the mountain has been used as a metaphor for the big challenges we face, especially ones that seem impossible to overcome. To scale our mountains, we actually have to do the deep internal work of excavating trauma, building resilience, and adjusting how we show up for the climb. In the end, it is not the mountain we master, but ourselves."-- Provided by publisherRead more...

First Time Caller
B. K. Borison

A hopeless romantic meets a jaded radio host in this cozy, Sleepless in Seattle–inspired love story from beloved author B.K. Borison. Aiden Valentine has a secret: he's fallen out of love with love. And as the host of Baltimore's romance hotline, that's a bit of a problem. But when a young girl calls in to the station asking for dating advice for her mom, the interview goes viral, thrusting Aiden and Heartstrings into the limelight. Lucie Stone thought she was doing just fine. She has a good job; an incredible family; and a smart, slightly devious kid. But when all of Baltimore is suddenly scrutinizing her love life—or lack thereof—she begins to question if she's as happy as she believed. Maybe a little more romance wouldn't be such a bad thing. Everyone wants Lucie to find her happy ending...even the handsome, temperamental man calling the shots. But when sparks start to fly behind the scenes, Lucie must make the final decision between the radio-sponsored happily ever after or the man in the headphones next to her.Read

I Who Have Never Known Men

Jacqueline Harman, Ros Schwartz (Translation), Sophie Mackintosh (Afterword)

WITH A NEW INTRODUCTION BY SOPHIE MACKINTOSH, MAN BOOKER PRIZE-LONGLISTED AUTHOR OF THE WATER CURE “It is surprising that a book with the psychological detail of a nightmare elicits in the reader feelings of such profound intensity.” — Le Monde “The delirium of I Who Have Never Known Men suggests the work of a feminine Kafka.” — Le Nouvel Observateur ‘For a very long time, the days went by, each just like the day before, then I began to think, & everything changed’ Deep underground, 39 women live imprisoned in a cage. Watched over by guards, the women have no memory of how they got there, no notion of time, & only vague recollection of their lives before. As the burn of electric light merges day into night & numberless years pass, a young girl - the fortieth prisoner - sits alone & outcast in the corner. Soon she will show herself to be the key to the others’ escape & survival in the strange world that awaits them above ground.°°° Jacqueline Harpman was born in Etterbeek, Belgium, in 1929, & fled to Casablanca with her family during WWII. Informed by her background as a psychoanalyst & her youth in exile, I Who Have Never Known Men is a haunting, heartbreaking post-apocalyptic novel of female friendship & intimacy, & the lengths people will go to maintain their humanity in the face of devastation. Back in print for the first time since 1997, Harpman’s modern classic is an important addition to the growing canon of feminist speculative literature. Ros Schwartz is an...[Read more...](#)

Lights Out: A Dark Stalker Rom-Com

Navessa Allen

“I don’t need another kink.” That thought pops into my head whenever I pull up my favorite social media app, but alas, every time I scroll, I learn something new about myself, and another one is born. And yes, I know I’m responsible for what the algorithm shows me, but I’m trying to ignore that fact. Lately, my feed has been dominated by masked men. I’ve favorited videos with them dressed in full cosplay, decked out in futuristic military apparel, and wrapped up like ghouls. But more than anything else, my FYP is filled with shirtless men wearing ghost masks. Bonus points if they’re heavily tattooed, wielding a knife, or covered in fake blood. At night, I dream about being chased by them, of them catching me and doing deliciously dark things to my more than willing body. I never could have guessed that by sending one drunken text, those dreams would become my new reality. [Read more...](#)

Boundaries Updated and Expanded Edition: When to Say Yes, How to Say No To Take Control of Your Life

Dr. Henry Cloud, Dr. John Townsend

Boundaries is the book that's helped over 2 million people learn when to say yes and know how to say no in order to take control of their lives. Does your life feel like it's out of control? Perhaps you feel like you have to say yes to everyone's requests. Maybe you find yourself readily taking responsibility for others' feelings and problems. Or perhaps you focus so much on being loving and unselfish that you've forgotten your own limits and limitations. Or maybe it's all of the above. In the New York Times bestseller, *Boundaries*, Drs. Henry Cloud and John Townsend help you learn when to say yes and know how to say no in order to take control of your life and set healthy, biblical boundaries with your spouse, children, friends, parents, co-workers, and even yourself. Now updated and expanded for the digital age, this book continues to help millions of people around the world answer these tough questions: Can I set limits and still be a loving person? What are legitimate boundaries? How do I effectively manage my digital life so that it doesn't control me? What if someone is upset or hurt by my boundaries? How do I answer someone who wants my time, love, energy, or money? Why do I feel guilty or afraid when I consider setting boundaries? How do boundaries relate to mutual submission within marriage? Aren't boundaries selfish? You don't have to let your life spiral out of control. Discover how boundaries make life better today Plus, check out *Boundaries* family collection...[Read more...](#)

Man's Search for Meaning

Viktor Emil Frankl

A book for finding purpose and strength in times of great despair, the international best-seller is still just as relevant today as when it was first published. "This is a book I reread a lot . . . it gives me hope . . . it gives me a sense of strength." — Anderson Cooper, Anderson Cooper 360/CNN This seminal book, which has been called "one of the outstanding contributions to psychological thought" by Carl Rogers and "one of the great books of our time" by Harold Kushner, has been translated into more than fifty languages and sold over sixteen million copies. "An enduring work of survival literature," according to the New York Times, Viktor Frankl's riveting account of his time in the Nazi concentration camps, and his insightful exploration of the human will to find meaning in spite of the worst adversity, has offered solace and guidance to generations of readers since it was first published in 1946. At the heart of Frankl's theory of logotherapy (from the Greek word for "meaning") is a conviction that the primary human drive is not pleasure, as Freud maintained, but rather the discovery and pursuit of what the individual finds meaningful. Today, as new generations face new challenges and an

ever more complex and uncertain world, Frankl's classic work continues to inspire us all to find significance in the very act of living, in spite of all obstacles.[Read more...](#)
